The annual meeting of the Board will be held in the Senate Chamber on the evening of Wednesday, April 30th.

Those marked * are elected by University Council.

Those marked † are elected by graduates.

UNIVERSITY COUNCIL.

The Council consists of the Chancellor, the Trustees, the members of the Senate, and an equal number of elected members.

The Chancellor is elected by the Council, except when two or more candidates are nominated, in which case the election is by registered graduates and alumni. He holds office for three years, and, as highest officer of the University, presides at meetings of the Council and Convocation, and at statutory meetings of Senate. In his absence he is represented by the Vice-Chancellor.

Of the elective members eight retire annually, except in every sixth year when ten retire. Successors are elected by registered graduates and alumni. Retiring members may be re-elected.

The Council has power to elect five trustees (one trustee retiring annually); to discuss all questions relating to the College and its welfare; to make representations of its views to the Senate or Board of Trustees; to decide on proposals for affiliation; and to arrange all matters pertaining to the installation of the Chancellor, to its own meetings and business, the meetings and proceedings of Convocation, and the fees for membership, registration and voting.

The annual meeting of the Council will be held on the Tuesday immediately preceding Convocation.

GENERAL INFORMATION.

HISTORICAL.

QUEEN'S UNIVERSITY was founded by an act of the British Parliament in 1841. From the first it has been open to students of both sexes, and of all denominations, without any test except that of qualification in scholarship for taking up the work in College classes. The attendance has steadily increased from the five students who made up the first class, to 240 in 1880, 430 in 1890, 727 in 1900 and 1,612 in 1910.

THE GOVERNMENT of the University is vested in three bodies: The Board of Trustees, which makes all appointments to the Staff, and controls the finances of the University; the University Council, which is an advisory body, largely representative of the Graduates; and the Senate, consisting of Professors in Arts and Theology, which regulates the courses of study, the awarding of degrees, and internal management.

A UNIQUE FEATURE of the University life at Queen's is the fact that discipline is almost entirely controlled by the students themselves through their Alma Mater Society. This Society is made up of students of all Faculties who appoint their own officers for the purpose of enforcing discipline, and most cases arising within the University and requiring attention of this kind are referred to these officers and are satisfactorily dealt with. This gives one of the most valuable lessons in social training and in citizenship that the University can provide.

DEGREES.

BY THE ROYAL CHARTER granted to Queen's College it is "willed, ordained and granted that the said College shall be deemed and taken to be an University, and that the students in the said College shall have liberty and faculty of taking the degrees of Bachelor, Master and Doctor in the several Arts and Faculties."

By this authorization, Queen's University confers degrees in Arts, Theology, Medicine, Science, Education and Law, upon the persons who are deemed eligible by the Senate, and who have complied with the requirements prescribed in respect to such degrees.

The degrees at present conferred under the statutes of the University are, as follows:

I.—IN ARTS.

Bachelor of Arts (B.A.), Master of Arts (M.A.).
Doctor of Philosophy, (Ph.D.).

II.—IN THEOLOGY.

Bachelor of Divinity (B.D.), and Doctor of Divinity (D.D.).

III.—IN MEDICINE.

Bachelor of Medicine (M.B.), Doctor of Medicine (M.D.),
Master of Surgery (C.M.), Doctor of Public Health (D.P.H.),
Doctor of Science (D.Sc.).

IV.—IN SCIENCE.

Bachelor of Science (B.Sc.), Master of Science (M.Sc.), and
Doctor of Science (D.Sc.).

V.—IN EDUCATION.

Bachelor of Pedagogy (B.Paed), and Doctor of Pedagogy
(D.Paed.).

VI.—IN LAW.

Doctor of Laws, (LL.D.), *Honorary only*.

EACH DEGREE has its distinctive hood, as follows:—

B.A.—Black, bordered with red silk.

M.A.—Scarlet.

B.D.—White, bordered with crimson plush.

D.D.—Black silk, lined with white silk.

M.B.—Black silk, lined with scarlet, bordered with white.

M.D. and M.D., C.M.—Scarlet, bordered with white.

B.Sc.—Black silk, bordered with yellow (old gold) silk.

M.Sc.—Black silk, lined with yellow, bordered with yellow.

D.Sc.—Yellow silk, bordered with black.

B.Paed.—Purple silk, lined with white silk.

D.Paed.—Purple silk, lined with white, bordered with white.

LL.D.—Black silk, lined with blue silk.

Ph.D.—Black silk, lined with purple, bordered with white.

THE LIBRARY.

The University Library contains about 60,000 books, besides many thousands of pamphlets, bound and unbound, with a yearly increase of about 2,700 books and pamphlets, including, in the various departments, all important works as they are issued. Valuable additions have lately been made in History, Classics, Theology and Political Science. The Canadian Section is particularly good especially in History, as it contains many rare and interesting works, and documents of a historical character which render it very valuable for research studies.

Many important donations have been received of late years from the British, United States, French and Italian Governments. Among these have been the publications of H.M. Stationery Office, the Hansards, and Blue Books of the British Parliament, the magnificent series of *Documents Inédits* in History and Fine Arts lately issued by the French Government, and the splendid set of *Columbiana* brought out by the Italian Government, to celebrate the Quatercentenary of Christopher Columbus. Other valuable collections of a similar nature are secured year by year in addition to the annual purchases required for the work in the various departments.

A large collection of magazines, periodicals and other publications in all departments, including the journals and transactions of the principal societies are available in the Library. In most cases these are complete from the first issue and are kept up-to-date by the annual additions.

As far as is consistent with the Library accomodation, arrangements have been made for both the ordinary work of the students and for more advanced studies. A large consulting room adjoining the Library and another in the new Arts building are equipped with dictionaries, encyclopedias, and other books of reference, while departmental libraries of a technical character are provided under the supervision of the professors in the various faculties, and are available for students working at particular problems. Students engaged in special work such as theses and debates have access to the Library shelves, on the recommendation of the professors, and have the benefit of individual help from the Library staff when required.

REGULATIONS.

The Library is open daily from 9 a.m. to 4.15 p.m. and during these hours students may obtain books for use either in the consulting rooms or at their homes.

Extra-mural students are supplied with books subject to certain regulations; and similar privileges are extended to all graduates of the University.

Text-books cannot be supplied from the Library. Intra-mural students may have as many as three books out at one time provided they do not all relate to the same essay. These books may be exchanged as often as desired, but must not be kept for more than one week without a new entry. For extra-mural students a deposit is required of \$2 for one book, \$4 for two, or \$5 for three. This deposit may be withdrawn at any time. There is no fee charged to extra-mural students for the use of the Library, but postage must be paid by the borrower, and will be deducted from the deposit. Books may not be kept for more than two weeks from the date on which they are received, except by special arrangement. Provisions are made for supplying the necessary books to extra-mural students for reading required in the Ph.D., the B.Paed. and the D.Paed. courses.

All communications concerning books and inquiries for further particulars regarding the Library and its regulations should be addressed to the Librarian, Queen's University. Deposits for books should also be made with the Librarian.

THE MUSEUM.

In 1867, an early date in the history of the University, Dr. Robt. Bell, late of the Geological Survey, Ottawa, was Professor of Geology and Curator of the Museum. He made a collection of geological and botanical specimens which formed the nucleus of the mammals, birds and ethnological specimens are among the most present museum. Even at this date the Bell collections of fossils, important in the museum.

Dr. Bell was succeeded in the curatorship by Prof. N. F. Dupuis and he, in turn, by Prof. Fowler. During Prof. Fowler's

administration the botanical collection was very largely increased, partly by Prof. Fowler's own very complete collection of Maritime Province plants, some 20,000 in number; and partly by contributions from friends of the University in all parts of the world. These latter specimens, 12,000 in number, illustrate the floras of North America, Europe, Asia, South Africa and Australia.

IN ZOOLOGY the Canadian fauna is represented by a large number of prepared specimens of mammals, birds, reptiles, fishes, insects and mollusca.

IN ETHNOLOGY there is a representative collection of the weapons, utensils, dresses and ornaments of the aborigines of North America, Queensland, New Guinea, Fiji, the New Hebrides, with smaller collections from Central India and Formosa.

ON THE HISTORICAL SIDE, there is much interesting material in the form of ancient coins, weapons, manufactures, &c., together with a considerable group of souvenirs of the siege of Port Arthur.

LABORATORIES.

During late years the tendency in scientific work has been to supplement the lectures and book information by demonstrations, investigations and experiments that deal with actual problems. This has made necessary a large expenditure by the University for the provision of laboratory rooms, equipment and supplies.

BIOLOGICAL LABORATORIES.

FOR THE WORK IN ANIMAL BIOLOGY three large laboratories are available. One for general work in dissection and histological demonstrations. It is capable of accommodating 120 students, and is supplied with all appliances and materials needed in the course. The second is used for practical histology and microscopic work by students in both Arts and Medicine; and the third is for practical Physiology. The latter two are fitted for 50 students each, and have all necessary instruments and supplies for efficient work by the classes in attendance.

THE BOTANICAL LABORATORIES occupy two large rooms and are especially fitted for the investigation of problems that relate to plant growth, life and disease. Necessary microscopes, reagents and material are provided for students' use.

CHEMICAL LABORATORIES.

THE CHEMICAL LABORATORIES are situated in Gordon Hall, which was opened for occupancy in the Autumn of 1911. This building is devoted entirely to work in Chemistry, and is thoroughly modern in every detail. There is a large lecture ampitheatre situated on the third floor with a seating capacity of 225, a small lecture room on the first floor and a small classroom on each of the first and third floors. On the third floor are two laboratories for General Chemistry, one for Medical Chemistry, and one for Electro-Analysis; on the second floor are two for Quantitative Analysis, one for Industrial Chemistry, one for Physical Chemistry and one for Gas Analysis. Besides these there are small separate laboratories for research, spectroscopic and photometric work. Each member of the staff is provided with separate office and laboratory where he may carry on his private investigations. A centrally located set of supply and store rooms is provided with elevator connection.

PHYSICAL LABORATORIES.

The Physical Laboratories are situated in the southern half of Ontario Hall. There is a large, well equipped lecture room with seating capacity of 125 on the second floor, and a small lecture and class room on the first floor. Two of the large rooms on the first floor are devoted to the more elementary laboratory work of the first and second years and a commodious room on the second floor is arranged as an electrical laboratory for advanced work. There are various other smaller rooms fitted for special purposes. One of them is for work with the Optical bench, spectrometry, polarimetry, and spectroscopy. Another is well equipped as a dark room for photography. A third is arranged for X-ray and photometric work. Other rooms are used as private laboratories, offices, apparatus rooms and store rooms. The library and reading room is a large, well-lighted room on the second floor.

For description of the laboratories in the School of Mining see Mining Calendar.

FIELD WORK.

GEOLOGY AND MINERALOGY.

Within a hundred miles of Kingston there is a greater variety of ores mined than is known in any similar area in Canada. Through

the kindness of friends of the University, especially mine managers, the GEOLOGICAL and MINERALOGICAL Museum situated on the ground floor of the Ontario Hall, is equipped with a splendid collection of minerals, ores, rocks, and fossils, classified and systematically arranged to illustrate most of the subjects treated of in lectures. Graduates or others wishing to investigate special geological problems will have all possible facilities placed at their disposal.

BOTANY.

The great diversity of land surface in the vicinity of Kingston enables the students of Botany to readily make field studies of the various plant associations.

Within two miles of the city limits are extensive reed marshes, bordered by water gardens well stocked with the swimming and submerged societies of plants. These are conveniently reached by street car and row boats.

A drive of eight miles permits the study of an excellent example of sphagnum moor, with all the plants of our latitude characteristic of muskeg conditions,—mosses, heaths, orchids, carnivorous plants, tamaracks and lichens. An hour's drive in another direction reaches a region of high, dry granite hills where xerophytic modifications dominate the flora.

A carefully preserved mesophytic meadow and forest plantation is within walking distance of the college. All of these are visited each session by the classes under the guidance of instructors, and are made the foundations of ecological studies.

THE SUMMER SCHOOL.

During July and part of August classes are held at the College for extra mural students and others desirous of improving their scholarship. The subjects offered are those in which personal instruction is especially required, as well as those demanding laboratory equipment and supervision. The course lasts for six weeks, from July 3rd to August 14th, in 1912. Because of small classes, frequent recitations, and almost individual instruction, it is found possible in this time to accomplish a satisfactory amount of work of good quality. Long periods for experimentation in open labora-

tories permit the students to overtake this side of their science studies, and this enables the College to offer extra-mural courses in subjects otherwise debarred from treatment *in absentia*. Field studies in the sciences of nature add to the variety as well as to the quality of the work. In addition to the regular courses for students desiring credit, each instructor gives a number of lectures each week on the fundamental principles, and general applications of his subject. These may take the form of a course of lectures or of laboratory demonstration but will be of value to all teachers and students of the subject. They are open to all students of the Summer School.

Matriculation standing is not required for admission, unless credit toward a degree is desired. All are permitted to attend the classes, whatever their preparation may have been.

Attendance in a subject at two summer sessions is accepted as the equivalent of one regular session of attendance in that subject.

The attendance of one year required from extra-mural students for a degree is considered as fulfilled by attendance during four sessions of the Summer School, provided the student has taken classes in four different departments during that time.

Attendance at the session of the Summer School is, however, not accepted in lieu of any part of the two years' of attendance required for Specialist standing.

No student is allowed to take more than three classes during one summer session.

There is no examination for credit in any subject taken in the Summer School other than the regular sessional examinations in September and April.

The classes offered in 1912 are:—

Latin—Professor G. W. Mitchell, M.A.

French—Professor P. G. C. Campbell, M.A.

Mathematics—Professor Buchanan, Ph.D.

English—Professor W. E. McNeill, M.A., Ph.D.

Physics—Professor W. C. Baker, M.A.

Chemistry—Professor W. D. Bonner, M.A., Ph.D.

Botany—Professor W. T. MacClement, M.A., D.Sc.
Animal Biology—Lecturer A. B. Klugh, M.A.

The Summer School Announcement will be sent to all requesting it. Address, The Registrar.

BOARDING HOUSES.

Lists of Boarding Houses may be obtained from the Registrar. Requests for these should state whether they are required for men or women students.

Men and women students are not permitted to lodge in the same houses unless they are members of the same family or receive special permission from the Senate. A list of approved houses where suitable accommodation is provided for women students will be furnished on application to the Registrar.

A woman's residence capable of accommodating a limited number of students has been established in connection with the University. Persons desiring information regarding it should communicate with the Secretary of the Women's Residence, Queen's University.

ADVISER TO WOMEN STUDENTS.

In order that women students may profit to the greatest extent possible by their attendance at the University, Mrs. W. E. McNeill, M.A., has been appointed to advise with them regarding their studies and other matters connected with their University life.

Mrs. McNeill's standing as a college graduate and her previous experience as Dean of Women at Bates College, give her eminent qualifications for the duties she has undertaken in this University.

Mrs. McNeill may be reached by correspondence addressed to her at the University; and during term time she may be consulted at her office in the New Arts Building.

HOSPITAL PRIVILEGES.

The Governors of the Kingston General Hospital agree to give those students who take out Hospital tickets (cost, \$2) all the advantages of a private room, including room, board, attendance of nurses in training, and ordinary medicines, when requiring medical or surgical treatment, from October 1st to May 1st. These benefits are conditional on 250 students taking out tickets by November 1st.

ATTENDANCE AT CHURCH.

All students are expected to attend the church of the denomination to which they profess to belong.

During the session Sunday afternoon services are conducted in the University by ministers of different denominations who are invited to preach to the students, professors and visitors.

EXPENSES OF COURSE.

The following statement of expenses is based on information obtained from students who have kept an account of their expenditures. Personal expenses are not included in the estimates. The average expense for class fees is taken in this estimate.

For a Session (October to May).

Board, lodging and washing	\$120 to \$150	
Books and stationery	15	25
Incidentals	10	15
Class and other fees	50	50
	<hr/>	<hr/>
	\$195	\$240

These estimates are based on board, etc., at from \$4 to \$5 per week, at which rate good board may be obtained in Kingston.

The fee for graduation is not included in the estimate. Students taking Science classes will pay additional Laboratory fees.

REMITTANCES.

Cheques or drafts will be received at par on any place where the Merchants' Bank of Canada has an agency; otherwise 15 cents per \$100 or fraction thereof should be added to cover bank charges. Remittances may also be made by Post Office Order or Express Order.

REGISTRATION.

ALL STUDENTS are required to have their names entered on the University Register, and all fees must be paid before registration.

In all cases the student's application for registration, accompanied by the necessary fees for the course to be taken, must be in the Registrar's hands by the date set for registration.

INTRA-MURAL students must register *in person*. Those registering during the first three days of the session (Oct. 2nd, 3rd and 4th) will be charged the regular fees. Registration may be made by intra-mural students up to one o'clock on October 11th, but those who register after Oct. 4th will be charged an extra fee of \$3.

Registration after Oct. 11th can be made only by permission of the Senate, and application for this must be received by the Registrar before that date.

EXTRA-MURAL STUDENTS taking the work of the winter session must have registered and paid all registration and tutorial fees by Oct. 21st. They are, however, strongly urged to register by Oct. 2nd in order that they may receive tutorial assistance for the full session.

Extra-mural students taking the work for the summer session must be registered by May 21st, but they are strongly recommended to register by May 1st in order that they may receive full tutorial assistance for the session.

STUDENTS will not be permitted to write on Supplemental examinations unless they have been registered for either the previous winter or the previous summer session.

THE REGISTRATION FEE for Arts is fourteen dollars.

RELATION TO OTHER INSTITUTIONS.

1.—THE ONTARIO DEPARTMENT OF EDUCATION.

The Department conducts the Matriculation Examination within the province and the University accepts these Departmental certificates as meeting the requirements for admission to the various faculties.

The Department accepts the courses of the Faculty of Education as the professional preparation for High School teachers and for First-class Public school teachers.

The teachers' certificates issued by the Department are valid *pro tanto* as admission certificates to the University classes.

2.—OTHER UNIVERSITIES.

Certificates of standing from other universities will be considered and equivalent allowances made to students seeking standing in this University. In all such cases application, accompanied by the necessary documents should be made to the Senate.

3.—AFFILIATION WITH ENGLISH UNIVERSITIES.

(a) OXFORD—Queen's University is one of those admitted to the privileges of the *Colonial Universities' Statute*.

These privileges are, (1) A student who has taken two full years' work at Queen's including Senior Greek will be admitted as a *Junior Student, i.e.*—he will be excused from the University Matriculation Examination known as *Responsions*. Such a student may reckon the term in which he matriculates as his fifth term, and, he may take his B.A. degree after a residence of eight terms instead of twelve, as ordinarily required, provided he passes the prescribed examinations.

(b) CAMBRIDGE—Graduates in Arts, provided they have passed one or more examinations after matriculation in (a) Latin; (b) either Greek, French or German; (c) Mathematics, are entitled to the benefit of the statute in regard to affiliated institutions, viz.,—(1) to be exempted from all parts of the *Previous Examination*, (2) to count the first term of attendance as the fourth of residence.

(c) LONDON—Queen's University is recognized under statute 116 of the University of London. Graduates of Queen's are therefore admitted to the courses leading to a degree at the University of London without passing the Matriculation of that University.

ADMISSION TO THE UNIVERSITY.

I.—BY MATRICULATION.

(1) Any person presenting a certificate of pass Junior Matriculation for Ontario will be admitted as an undergraduate upon payment of the registration fee.

(2) The Pass Junior Matriculation examination is conducted for the universities of Ontario by the Department of Education. It will be held in June of each year at the universities and at the various Collegiate Institutes and High Schools of Ontario. Candidates for this examination must apply to the Public School Inspector of their city or county, on an official form to be obtained from him and pay him the examination fee of \$8 before the 24th of May. Candidates proposing to write at Queen's University must send the required notice to the Registrar, accompanied by the fee of \$8, by May 15th.

(3) The subjects for Junior Matriculation are English Composition, English Literature, Algebra, Geometry, History (Ancient, British and Canadian), Latin, and any two of Greek, French, German, Experimental Science (Physics and Chemistry).

(4) The pass standard is forty per cent. of the marks assigned to a paper with an average of sixty per cent. on all papers.

(5) A candidate who makes the average of 60% on the whole examination but who fails to make 40% on not more than three papers may complete Junior Matriculation by passing on these papers at any one subsequent examination. A candidate who fails to make 40% on more than three papers or who fails to make the average of 60% must repeat the whole examination.

(6) A candidate who has obtained partial Matriculation standing under the regulations in force in a previous year may present himself for examination in the papers necessary to complete his Matriculation.

(7) THERE IS A SECOND EXAMINATION in September, held under the following regulations:—

(1) THE SUPPLEMENTAL PASS MATRICULATION examination will be conducted by the Department of Education for the University Matriculation Board at the following centres:—

(a) The University of Toronto; Queen's University, Kingston; McMaster University, Toronto; and the Western University, London.

(b) Any of the following centres which are requested by applicants prior to September 1:—Windsor, Chatham, Sarnia, St. Thomas, Woodstock, Brantford, Welland, St. Catharines, Hamilton, Goderich, Stratford, Berlin, Guelph, Wiarton, Owen Sound, Barrie, Port Hope, Lindsay, Peterborough, Belleville, Picton, Brockville, Cornwall, Ottawa, Smith's Falls, Renfrew, North Bay, Sault Ste. Marie, Port Arthur, New Liskeard.

(c) Subject to the approval of the University Matriculation Board, other centres (i.) in Ontario at the request of candidates, if application is received prior to August 25th; (ii.) in Canada at the request of a University named in (a), if application is received prior to August 1.

(8) The subjects of the examination, the prescription of work and the standard required shall be the same as for the annual Pass Junior Matriculation examination of the same year.

(9) The fee for writing on the Supplemental Examination shall be \$2 for each paper with a maximum fee of \$10.

(10). Candidates may write at any one of the four University centres mentioned in 1 (a) without any additional cost to themselves.

(11) Candidates who write at any other centre, in addition to paying the fee required in (9), must also defray the local expenses of conducting the examination. These include the cost of supplies, any charge for the examination room, express charges, and the allowance to the Presiding Officer at \$4 per day.

(12) Applications to write on the examination, together with the necessary fee, must be received at the Department of Education not later than September 1, for those who wish to write at any centre established in Ontario, and not later than August 1 for any centre elsewhere in Canada.

(13) Candidates who have failed to make application as specified in (6) may be admitted to the examination at a centre already established, provided the accommodation is adequate and the number of question papers sufficient. In such cases the Presiding Officer shall collect the required fee with one dollar additional, and forward it to the Department of Education at the close of the examination.

(14) Forms of application, the time-table of the examination, and further particulars may be had upon application to the Department of Education.

(15) THE FEES for Pass Junior Matriculation, when taken in June are, as follows:—

Full Matriculation	\$8 00
Partial Matriculation in not more than four papers..	3 00
More than four papers	8 00
When taken in September, for each paper, \$2, with a maximum of	10 00

II.—BY EQUIVALENT EXAMINATIONS.

(1) Candidates who produce certificates of Matriculation into any University in the British Empire will be allowed to enter upon a course without further examination. Matriculation examination for universities in other countries than the British Empire will be accepted *pro tanto*.

(2) Any person will be permitted to attend on presentation of an Ontario Junior Leaving or Entrance to Normal School certificate or equivalent certificate from any of the other Provinces provided that such certificate includes Latin. If he has not passed the Matriculation examination or its equivalent in Greek, French or German, he must do so before taking the Junior class examination. An examination of students qualifying for Matriculation in any of these three subjects will be held at some time during the session, the date to be determined by the professors concerned. Students who have passed the Matriculation examination in Greek, French, or German before the close of the session may take the Junior class extra-murally during the summer and may present themselves for examination in September.

(3) Teachers' examinations are accepted *pro tanto* in lieu of the Matriculation Examination, *i.e.*, in so far as the subjects correspond, as follows:—

Ontario.....	Jr. Leaving, Entrance to Normal School.
Prince Edward Island...	Second Class.
Nova Scotia.....	Grade XI.
New Brunswick.....	Second Class.
Quebec.....	} Academy Grade III. University School AA
Manitoba.....	
Alberta.....	Second Class.
Saskatchewan.....	Grade VII.
British Columbia.....	Grade VII.
Newfoundland.....	Intermediate.
	Intermediate (50% required).

III.—BY SPECIAL REGULATION.

(1) In the case of students over the age of 21 attending the university, the Senate may postpone the Matriculation examination.

(2) Students entering under this regulation not having matriculated in Latin must take Latin for one session and matriculate in that subject before entering the Junior class. For Greek, French, or German they will be subject to clause 2, II, above.

(3) A candidate who is actually engaged in a mercantile industrial, or other occupation may proceed to pass Junior Matriculation under the following conditions:—

(a) He may present himself for one or more subjects at any June or September Examination.

(b) At any such Examination he will receive credit for a subject or subjects on obtaining 40 per cent. on each paper and an aggregate of 60 per cent. of the total marks assigned to such subject or subjects. There are two papers given in each subject.

(c) Matriculation must be completed under these conditions within four consecutive years.

(d) In order to secure credit for the subject or subjects written on, a candidate who desires to matriculate under these conditions

must, immediately on receipt of his Departmental statement of marks, return the same to the Deputy Minister of Education accompanied by a certificate from his employer to the following effect:—

.....191....
I,.....do hereby certify that
was in my employ from.....to in the
capacity of.....and that this employment made it
impossible for him to attend the regular day sessions of a secondary school.
My business is that of
located at
(Give business address in full)

.....
(Signature in full).

To the Deputy Minister of Education.

(4) Candidates for a degree unless twenty-one years of age, must pass the Matriculation examination or an examination accepted by the Senate as equivalent to Matriculation before being admitted to examination on the University courses leading to a degree.

HONOUR MATRICULATION.

(1) The Honour Matriculation examination is conducted for the Universities of Ontario by the Department of Education. It is held in June of each year; and, in difficulty, it is approximately equal to the first year examinations in the University. Candidates who intend to pursue an Honour course in the University are advised to take this examination in as many subjects as possible.

(2) The subjects of examination for Honour Matriculation are as follows:—

English, Latin, History, Mathematics and any two of Greek, French, German, Experimental Science, Physics and Chemistry.

*(3) A candidate who holds a Senior Matriculation, Senior Leaving, or Entrance to Faculty of Education certificate of Ontario, or an equivalent certificate from another Province will,

*NOTE.—Candidates intending to avail themselves of this clause should write the Deputy Minister of Education, stating where and when they wrote, and have their marks forwarded to the Registrar, who will advise the classes allowed.

on payment of the *pro tanto* fee, be allowed the junior classes in as many as five of the following subjects, provided he has made 40% in each:—Latin, Greek, French, German, Mathematics, English, History, Chemistry and Physics. A student who claims standing in Physics and Chemistry under this provision must, *before proceeding to the Senior Class in these subjects*, take two hours work per week for one year in the Junior Physics Laboratory, and three hours work per week for one year in the Junior Chemical Laboratory and pass the examinations in Physics and Chemistry of the Junior class.

(4) A candidate holding only Part I or Part II of the Ontario certificates mentioned in the preceding paragraph will not be allowed more than two classes.

(5) A candidate without a full certificate will in no case be allowed more than four subjects. Such a candidate will be allowed two less than the number of classes in which he has passed and in each of which he has made 50 per cent.; but he will be allowed each class, to the number of four, in which he has made 70 per cent.

(6) A candidate who has not Junior Matriculation or its equivalent in at least one foreign language will not, in any case, be allowed more than three classes.

(7) It is possible for a student who is allowed four classes to complete a course for a degree in three years.

(8) Certificates from the different provinces will be accepted for the certificate of Ontario Honour Matriculation as follows:—

Ontario	Entrance to Faculty of Education. Sr. Teachers'.
Prince Edward Island	First Class.
Nova Scotia	Grade XII.
Newfoundland	Associate (75%).

(Allowance on Associate examinations will be given only in English, Latin, Greek and French).

New Brunswick	First Class.
Manitoba	First Class.
Saskatchewan	Grade VIII.
Alberta	Grade VIII.
British Columbia	Senior Academic.

EXTRA-MURAL STUDENTS.

(1) A method of taking University work without full attendance at classes has been established with a view of providing for those who are unable to attend for a complete course or who wish to take up a portion of the work without joining the regular classes.

I.—NATURE OF COURSES.

(2) The work is as nearly as possible identical with that taken up by intra-mural students and all examinations must be written on in the regular way.

Extra-mural students must write the essays and at least 80 per cent of the exercises prescribed and send them on the dates specified. For information regarding essays and exercises, see the sections concerning extra-mural students in "Subjects of Study."

(3) Students should address their work and all inquiries to "The Tutor in (whatever the subject may be), Queen's University, Kingston, Ont." In no case should the name of the tutor be used. The date of each essay or exercise coming in and of each criticism or fresh piece of work going out is tabulated at the college office.

(4) As five classes make a full year's work for an intra-mural student who gives all his time to study, and has the advantage of class instruction, extra-mural students are strongly advised not to attempt more than two or three subjects at once unless they can devote all their time to the work.

(5) Students are strongly advised to attend for the latter part of the course if possible. If this is not feasible they should not attempt more than a pass course.

(6) The Academic Year extends from October 1st to September 30th. The Winter Session extends from October 1st until the end of the April examinations, and the Summer Session, from May 1st until the close of the September examinations.

II.—REGULATIONS.

1. Candidates for a degree must, before being registered, pass the Matriculation examination or its equivalent.

2. No one is permitted to take work at Queen's in the same year that he is taking work at any other educational institution, or writing on any outside examinations other than junior matriculation.

3. In order to register for the first time extra-mural students must be residents of Canada. Students residing outside of Canada who have attended the University for one session, or who have been registered as extra-mural students while residing in Canada, are allowed to complete their course.

4. Students who have completed three years' work, covering three-fourths of the classes required for a degree, are entitled on payment of a fee of \$5.00 to a University Diploma.

5. No student is permitted to sit for the examinations in any subject in April or September unless he has sent in the essays and at least 80% of the exercises prescribed in that subject.

6. If a student is unable to complete the prescribed work during a session—winter or summer, he must register in the following session and complete the work, before he is allowed to sit for examination. In this case he must pay the fees again. See under FEES, Sec. 6.

III.—ATTENDANCE.

1. All extra-mural students proceeding to a degree, are required to attend at least one full session. (This clause does not apply to students registered before October 21st, 1909.)

2. Extra-mural students taking specialist courses for teachers are required to attend not less than two full sessions.

3. Extra-mural students may become intra-mural students at any time during the winter session after December 1st, in those classes in which they have satisfactorily completed the work prescribed up to the date of their transferring. Fees already paid will be applied on intra-mural charges, and the balance alone will be charged.

4. Oral and dictation examinations in Final Honour French and German and practical examinations in Science must be taken at the University.

IV.—REGISTRATION.

1. Extra-mural students must register for the winter session by Oct. 21st. They are, however, strongly recommended to do so by Oct. 1st in order to receive full tutorial assistance. Application for registration must be accompanied by registration and tutorial fees and must reach the Registrar by the date specified.

2. Extra-mural students must register for the summer session by May 21st, paying both registration and tutorial fees. They are, however, strongly recommended to do so by May 1st in order to receive full tutorial assistance.

3. The registration fee of \$10 each session and complete tutorial fees for either the winter or summer session of the Arts course must be sent to the Registrar together with the registration form supplied on request. On receipt of the proper fees a registration card and the first instalment of the work prescribed will be forwarded.

4. Students who have been granted any allowance on work already taken elsewhere must pay a *pro tanto* fee of \$10 with their first registration fee in order to have this allowance entered.

V.—EXAMINATIONS.

1. Candidates must have completed the prescribed work—see Regulations II, 5.

2. Students who register in the winter and complete the prescribed work in any pass subject before April may write either on the April or September examinations as preferred, without payment of further registration or tutorial fees. Those who register in the summer and complete the prescribed work may write in September. If they wish, however, to postpone the examination they must register again and pay the fees. September examinations are on pass subjects only.

3. The examinations may be taken either at the University or at one of the special local centres:

PRINCE EDWARD ISLAND, Charlottetown; NOVA SCOTIA, Sydney, Truro, Halifax, Amherst, Yarmouth. NEW BRUNSWICK, St. John, Fredericton, Chatham, Campbellton. QUEBEC, Quebec, Montreal, ONTARIO, Windsor, Chatham, Sarnia, London 2, Stratford, Wood-

stock, St. Thomas, Goderich, Glencoe, Leamington, Walkerton, Owen Sound, Orangeville, Brantford, Hamilton, Simcoe, Welland, Collingwood, Orillia, Huntsville, North Bay, New Liskeard, Sudbury, Sault Ste. Marie, Fort William, Toronto, Peterborough, Port Hope, Parry Sound, Haliburton, Belleville, Madoc, Bancroft, Renfrew, Smith's Falls, Brockville, Cornwall, Ottawa, Vankleek Hill, Guelph, Berlin, Kenora. MANITOBA, Winnipeg, Brandon, Portage la Prairie, Minnedosa, Souris, Deloraine, Morden, Emerson, Dauphin. SASKATCHEWAN, Moosomin, Yorkton, Regina, Moose Jaw, Lanigan, Saskatoon, Swift Current, Maple Creek, Estevan, Prince Albert, North Battleford, Wilkie, Wolseley, Arcola, Oxbow, Balcanes, Quill Lake. ALBERTA, Medicine Hat, MacLeod, Calgary, Red Deer, Hardisty, Gleichen, Edmonton, Stirling, Lloydminster, Vegreville, Stettler, Laggan. BRITISH COLUMBIA, Revelstoke, Kamloops, Yale, Vancouver, Victoria, Nanaimo, Nelson, Kelowna, Cranbrook, Prince Rupert.

5. Application to the Registrar for examination on the particular subjects upon which students propose to write must be made by March 15th for April examinations and August 15th for September examinations. Students wishing to have new examination centres established or old centres re-established, must make application, accompanied by the special fee of \$10.00 by March 1st for April examinations and by August 1st for September examinations.

6. The University Examination fee of \$10 for Pass classes or \$12 for Honour (or Pass and Honour) classes must be paid to the Registrar in advance.

7. Students applying to write at outside centres must send also \$1 for each half-day examination and \$1 for each oral examination, to remunerate the presiding examiner.

VI.—FEES.

TUTORIAL FEES:—

1. The tutorial fee for each pass class is \$5.
2. For each honour class and for each group or part of a group of Honour Mathematics the fee is \$10.
3. A fee of \$2 is charged for any change of subjects after registration.
4. Extra-mural students who enter as intra-mural students during the winter session will have their fees applied on intra-mural charges and need then pay only the balance.
5. In no case whatever will refunds be made. In case of sickness, application (*accompanied by a doctor's certificate*) to have fees carried over will be considered if made within one month of registration.
6. Attention is called to the fact that if assistance is required in any subject during the session and also during the summer months, or if exercises in a subject have not been completed the fees must be paid twice.

VII.—REMITTANCES.

Cheques or Drafts will be received at par on any place where The Merchants' Bank of Canada has an agency, otherwise 15 cents per \$100 should be added to cover bank charges. Remittance may be made by Post-office or Express order.

VIII.—LIBRARY.

Extra-mural students may obtain books from the Library, with the exception of those marked in the Calendar as text-books, which must be purchased by students for themselves, and cannot be supplied from the University Library. A deposit is required of \$2.00 for one book, \$4.00 for two, and \$5.00 for three. Deposits may be withdrawn at any time. There is no fee, but the postage is paid by the borrower, and is deducted from the deposit. For further particulars and regulations apply to the Librarian. Special arrange-

ments are made for supplying the necessary books to extra-mural students in the Ph.D., B.Paed., and D.Paed. courses. Books may be kept for not more than two weeks from date of receiving, except by special arrangement.

All communications concerning books, and all deposits must be addressed to the Librarian; with whom all deposits connected with the Library must also be made.

FEES.

Graduation and spring examination fees must be paid before March 23rd; supplemental examination fees before September 1st, or August 15th if the student is writing away from the University, (see page 39), all other fees on or before October 4th. Intra-mural students should register promptly at the opening of the session. Students failing to register in person within the first three days of the opening of the session shall pay an extra registration fee of \$3.

UNIVERSITY PRIZES, MEDALS AND SCHOLARSHIPS.

SPECIAL SCHOLARSHIPS.

THE RHODES SCHOLARSHIP IN CANADA.

Queen's University will, in January, 1914, select a candidate under the *Rhodes' Bequest*. The scholar will begin residence at Oxford in October of the year for which he is elected.

The Scholarship is tenable for three years, and is of the value of £300 per annum.

ELIGIBILITY OF CANDIDATES.

1. Candidates shall be British subjects and unmarried. They must have passed their nineteenth but not have passed their twenty-fifth birthday, on October 1st of the year for which they are elected.

2. An elected scholar must have reached at least the end of his sophomore or second year's work at some recognized degree-granting University or College of Canada.

3. Candidates may elect whether they will apply for the Scholarship of the Province in which they have acquired any considerable part of their educational qualification, or for that of the Province in which they have their ordinary private domicile, home or residence. They must be prepared to present themselves for examination or election in the Province they select. No candidate may compete in more than one Province, either in the same or in successive years.

4. Only candidates who have passed an equivalent to the Oxford Responsions Examination, or those who are exempted from Responsions by the Colonial Universities' Statute, are eligible for election.

Queen's University having applied for and been admitted to the privileges of the Colonial Universities' Statute, candidates coming from Queen's University who have fulfilled the conditions are accepted as candidates for Rhodes' Scholarships without further examination.

METHOD OF SELECTION.

In accordance with the wish of Mr. Rhodes, the Trustees desire that "in the election of a student to a Scholarship, regard shall be had to (1) his literary and scholastic attainment, (2) his fondness for and success in manly out-door sports, such as cricket, football and the like, (3) his qualities of manhood, truth, courage, devotion to duty, sympathy for and protection of the weak, kindliness, unselfishness and fellowship, and (4) his exhibition during school-days of moral force of character, and of instincts to lead and to take an interest in his schoolmates." Mr. Rhodes suggested that (2) and (3) should be decided in any School or College by the votes of fellow-students, and (4) by the Head of the School or College.

Where circumstances render it impracticable to carry out the letter of these suggestions, the Trustees hope that every effort will be made to give effect to their spirit, but desire it to be understood that the final decision must rest with the Committee of Selection.

Rhodes Scholars: 1905, J. M. Macdonnell, M.A.; 1907, Norman S. Macdonnell; 1912, H. S. Smith.

EXHIBITION OF 1851, SCIENCE RESEARCH SCHOLARSHIP.

This scholarship, of the annual value of £150 stg., is awarded by Her Majesty's Commissioners for the Exhibition of 1851 to students who have given evidence of capacity for original research, and (except in very special circumstances) are under 30 years of age.

The nominee must be a British subject, must have been a *bona fide* student of this University for three years, must have been a student of this University for a full year immediately before his nomination, must be a student of this University at the time of his nomination, (or he must have been a student at this University for a full year ending within twelve months prior to his nomination and since ceasing to be such student must have been engaged solely in scientific study) and must pledge himself not to hold any position of emolument while holding the scholarship. He is recommended to the Commissioners by the Senate of the University. The scholarship may be held for a second year, if the report of the first year's work be satisfactory to the Commissioners. The scholar will in the absence of special circumstances, be required to proceed to an institution other than that by which he is nominated, and there pursue some investigation likely to promote technical industries or scientific culture. The particular investigation the student proposes to pursue must be stated before a scholarship can be awarded.

The next recommendation will be made by the Senate in April, 1913.
Science Research Scholars recommended by Queen's University:—

Norman R. Carmichael, M.A., 1894.

Thomas L. Walker, M.A., 1896.

Frederick J. Pope, M.A., 1898.

Wm. C. Baker, M.A., 1900.

C. W. Dickson, M.A., 1901.

C. W. Knight, B.Sc., 1904.

F. H. McDougall, M.A., B.Sc., 1905.

Campbell Laidlaw, B.A., M.D., 1907.

N. L. Bowen, M.A., B.Sc., 1909.

Walter A. Bell, 1911.

PRIZES.

These are prizes for literary articles, essays, etc., as specified under each particular prize, and are open to students of the present or preceding session.

CONDITIONS OF COMPETITION.—1. Competitive papers must be given to the Registrar not later than 21st of March.

2. Each paper is to bear a motto, instead of the author's name, and must have attached to it a sealed envelope, bearing the same motto and containing a written declaration over the author's signature, to the effect that it is his unaided composition.

3. The envelope attached to successful papers shall be opened and the writer's name made known at the Convocation at the close of the session.

4. The best productions must be reported by the examiners to be of sufficient merit.

5. All successful productions shall be the property of the University, and shall be at the disposal of the Senate.

GENERAL REGULATIONS.

GENERAL STUDENTS.

1. General students are those who do not intend to proceed to a degree. They are exempt from matriculation and sessional examinations and from the regulations regarding classes.

2. *No one is admitted to the University as a general student who is under eighteen years of age at the date of registration.*

REGULATIONS REGARDING CLASSES.

(Note—The College year extends from October 1st to September 30th).

ORDER OF CLASSES.

1. Junior matriculants must in the first year of their course choose their classes from the following list:

Junior Latin, Junior Greek, Junior German, Junior French, Junior English, Junior Mathematics, Junior Physics, Junior Chemistry, Botany, Animal Biology, Mineralogy.

This restriction does not apply to students in Course A taking Junior Latin, Junior French and Junior Greek.

2. Students taking Arts classes with a view to registration with the Ontario Medical Council will note that a certificate of having completed the first year's work will be issued only when the following classes have been passed:—Mathematics, Physics, Chemistry, English, Latin, and French or German or Greek.

3. Students intending ultimately to take the work of the Faculty of Education should select a course in Arts which contains the subjects on which they will subsequently have to pass in Education. If they have not passed the Faculty Entrance examination they are recommended to take Junior classes in Mathematics, English, Latin, and in the optional group. See Faculty of Education Calendar.

4. Students should take the Pass classes in English, Latin, Greek, French, German and Mathematics in the first two years of their course.

5. No student is allowed to take a Senior class until he has passed the Junior class in the same subject or to take a Junior class and a Senior class in the same subject in one college year.

NUMBER OF CLASSES IN A YEAR.

6. No student is allowed to attend or to pass more than five classes in any college year.

7. *Intra-mural students in each of their first two years must take at least three classes.*

ATTENDANCE AND WORK.

8. All students are required to write 80% of the essays and exercises, to do 80% of the required Laboratory work, and to attend 80% of the class lectures during their period of intra-mural attendance, as necessary conditions of coming up for the April or September examinations.

9. A student who has registered and failed to pass the examination in any pass class must repeat the attendance and examination in that class in his next year at the University if he intends taking that class in his course.

10. In case of failure in three classes in each of any two consecutive years the Senate may require the discontinuance of the student's course.

REGULATIONS REGARDING EXAMINATIONS.

CHRISTMAS EXAMINATIONS.

1. A sessional examination to be known as the Christmas examination may be held at the option of any department during the month of December, at dates to be posted by the Registrar. Such examinations shall be limited to students in junior and senior classes. Credit not exceeding 25% of the total examination marks may be assigned to these examinations.

APRIL EXAMINATIONS.

2. The regular sessional examinations in all subjects, Pass and Honour, are held in April.

3. *Intra-mural students proceeding to a degree must take the examinations in April in all subjects in which they are registered. Permission to postpone Pass examinations until September may be obtained in special cases but only upon the recommendation of the professors concerned.*

4. The time-table for the April examinations in the Pass subjects may be found on page 7 of this Calendar.

5. The time-table for the Honour examinations is issued each year in March.

SEPTEMBER EXAMINATIONS.

6. Supplemental examinations, in Pass subjects only, are held in September.

7. The September examinations are open to extra-mural students and to intra-mural students who failed in the April examinations or who were permitted to postpone their examinations under Regulation 3.

8. The time-table for the September examinations may be found on page 8 of this Calendar.

CONDITIONS OF ADMISSION TO THE APRIL OR SEPTEMBER EXAMINATIONS.

9. All students are required to write 80% of the essays and exercises, to do 80% of the required Laboratory work, and to attend 80% of the class lectures during their period of intra-mural attendance, as necessary conditions of coming up for the April or September examinations.

10. At least two weeks before the examinations begin, each candidate must apply to the Senate for permission to write on the subjects in which he desires to be examined. Printed forms for the purpose may be obtained from the Registrar.

The application, if approved by the Senate, will be stamped by the Registrar and returned to the candidate before the beginning of the examinations.

No candidate will be allowed to appear at an examination unless his application has been approved by the Senate and his examination dues have been paid.

11. No candidate will be admitted to the examination hall later than thirty minutes after the beginning of the examination.

12. No candidate will be permitted to take any books or papers into the examination hall except by express direction of the examiner.

DETERMINATION OF STANDING.

13. In determining a student's standing at a sessional examination the Professors in the different departments are entitled to take into account the entire class record.

14. Credits not exceeding 25% of the total examination marks may be assigned for each paper in the Christmas examinations.

15. PERCENTAGES REQUIRED:

Pass Standing, Division 1, 70 per cent. and over.

Division 2, 55 to 69 per cent.

Division 3, 40 to 54 per cent.

Honour Standing, Class I, 75 per cent. and over.

Class II, 66 to 74 per cent.

Class III, 50 to 65 per cent.

DETAILS OF SUBJECTS OF STUDY FOR B.A. AND M.A. DEGREES.

LATIN.

PROFESSOR—William B. Anderson, M.A. (Aberd. et Cantab.)

ASSOCIATE PROFESSOR—George W. Mitchell, M.A.

ASSISTANT PROFESSOR—Wm. M. Smail, M.A. (Edin.), B.A. (Oxon. et Lond.)

TUTORS—W. Clifford Clark, M.A.

F. L. Burnet, B.A.

H. S. Smith.

PREPARATORY CLASS.

This class will read the texts prescribed for Junior Matriculation, 1913. For grammar and composition Mitchell's *Introduction to Latin Prose* will be used.

JUNIOR CLASS.

Translation from the books specified below, with questions on grammar and subject matter; for grammatical study Bennett's *Latin Grammar* (Allyn and Bacon) or Postgate's *New Latin Primer* (Cassell) is recommended.

Latin Prose Composition based on the texts read and on Mitchell's *Latin Composition*.

Roman History, from 264 to 44 B.C.; Shuckburgh's *History of Rome for Beginners* (Macmillan) is recommended.

Wilkins, *Roman Antiquities* (Macmillan).

Livy, Book XXI, ed. Capes and Melhuish (Macmillan).

Vergil, *Aeneid*, Book IX, ed. Sidgwick (Pitt Press) or Stephenson (Macmillan).

Lectures will be given on these two books, and in the examination one or more passages will be set for translation from Cicero, *Pro Lege Manilia* (ed. Wilkins: Macmillan), which will not be read in class.

SENIOR CLASS.

Translation at sight from Jerram's *Anglice Reddenda* (Second Series).

Prose Composition based on the texts read and on North and Hillard's *Latin Prose Composition*.

Roman History from 509 to 23 B.C. (Shuckburgh's *Smaller History* is recommended).

Wilkins' *Roman Literature* (Macmillan), Parts I and II.

Translation from the books specified below, with questions on grammar and subject matter; Cicero, *Philippic V.*, ed. Brighthouse (Blackie); Sallust, *Catiline*, ed. Cook (Macmillan); Vergil, *Georgics IV*, ed. Sargeaunt (Blackwood); Horace, *Selected Odes*, II and IV, ed. Wickham (Clar. Press).

HONOURS.

I.—PRELIMINARY.

Prose Composition. Text-book, *Second Latin Exercise Book*, by J. B. Allen (Clarendon Press).

Verse Composition. Instruction is given in this subject to those who desire it.

Translation at Sight. *Models and Exercises in Unseen Translation*, by Fox and Bromley (Clarendon Press).

History and Literature to the death of Marcus Aurelius. Papers will be set and lectures given on these subjects throughout the session. For the history of the Republic the works of Wells, Myres, How and Leigh (to the death of Caesar), and Liddell (revised by Benecke) may be recommended. For the imperial period Bury's *Roman Empire* should be read. Pelham's *History of Rome* gives an excellent account of the constitutional and political development of the state.

For a fuller treatment of the subject Mommsen's *History of Rome*, Ferrero's *Greatness and Decline of Rome*, and Greenidge's *Roman Public Life* may be consulted.

For the literary history Mackail's *Latin Literature* and Tyrrell's *Latin Poetry* must be thoroughly studied. Students are strongly advised to read also Duff's *Literary History of Rome*. Other good works are Glover's *Virgil*, Boissier's *Country of Horace and Virgil*, and Sellar's *Roman Poets of the Republic, Horace and the Elegiac Poets, and Virgil*.

Latin works prescribed. (Stress is laid on the literary qualities of the books, on important textual questions, and on points of interpretation, history, or archaeology arising from the subject-matter).

Plautus, *Trinummus*, ed. Gray (Pitt Press) or Fairclough (Macmillan).

Catullus, *Select Poems*, ed. Simpson (Macmillan).

Cicero, *Pro Cluentio*, ed. Peterson (Macmillan).

Letters, I-XXXIII in Tyrrell's selection (Macmillan).

Vergil, *Georgics*, Bk IV, *Aeneid*, IV-VI; ed. Sidgwick (Pitt Press) or Page (Macmillan).

Horace, *Odes*, Bk. III (any good edition).

Livy, Bk. XXII, ed. Dimsdale (Pitt Press).

Juvenal, *Satires* I, III, X, ed. Duff (Pitt Press).

Tacitus, *Histories*, Bk. I, ed. Davies (Pitt Press).

II.—FINAL.

N.B.—The Final and Preliminary classes cannot be taken in the same year.

Prose Composition. Text-book, W. R. Hardie, *Latin Prose Composition* (Edward Arnold).

Verse Composition. See syllabus of the Preliminary section.

Translation at Sight from Fox and Bromley, *Models and Exercises in Unseen Translation* (Clarendon Press).

The study of the development of Latin Poetry down to the Ciceronian age; based on *Fragments of Latin Poetry*, ed. W. W. Merry (Clarendon Press).

Catullus, *Select Poems*, ed. Simpson (Macmillan).

Cicero, *De Oratore*, Book I, ed. Wilkins (Clarendon Press).

Letters, as prescribed for Preliminary section.

Vergil, *Eclogues* I, IV, VIII, X, *Georgics*, Bk. II, *Aeneid*, VII, IX, XI.

Horace, *Epistles*, Bk. II (including *Ars Poetica*), ed. Wilkins, (Macmillan), Wickham (Clarendon Press), or Morris (American Book Co.).

Seneca, *Selected Letters*, ed. Summers (Macmillan), Nos. 5, 12, 15, 28, 43, 44, 47, 56, 57, 63, 76, 77, 84, 108.

Juvenal, *Satires*, I, III, VII, X.

Tacitus, *Histories*, Bk. I, ed. Davies (Pitt Press).

GENERAL NOTICE TO LATIN STUDENTS.

Members of the Latin classes should provide themselves with a Classical Dictionary (Smith's *Smaller Classical Dictionary*, or Harper's or Seyffert's Classical Dictionary), and also with a Classical Atlas (Kiepert's or Murray's is recommended), or at least with a map of ancient Italy (in Murray's series of *Handy Classical Maps*). In Gow's *Companion to School Classics* (Macmillan) will be found an excellent summary of many things which the student of Latin ought to know. The *Cambridge Companion to Latin Studies* would be found extremely helpful, especially by Honour students.

EXTRA-MURAL STUDENTS.

Extra-mural courses, Junior, Senior, and Preliminary Honours, will be conducted during the winter session. There will also be Junior and Senior courses in the summer session, under the direct supervision of one of the professors, in which all the work in Composition necessary for the Supplemental Examinations in September will be covered.

Instructions and advice will be sent to all students as soon as they register.

N.B.—It is absolutely necessary that all the prescribed exercises be sent in regularly.

GREEK.

PROFESSOR—T. Callander, M.A. (Aberd. Oxon.)

ASSOCIATE PROFESSOR—G. W. Mitchell, M.A.

ASSISTANT PROFESSOR—W. M. Smail, M.A. (Edin.), B.A. (Oxon.).

TUTOR—C. R. Owens, B.A.

PREPARATORY CLASS.

Students who have not passed Junior Matriculation, or its equivalent, in Greek, must take the Preparatory Class. Those who pass the Matriculation Examination at Christmas may take the Junior Examination in April; but, provided Matriculation is passed before the close of the session, a student may take the Junior Class extra-murally during the summer and present himself for examination in September.

JUNIOR CLASS.

Goodwin, *Greek Grammar*.

Translation from authors not specified.

Goodwin, *Greek Reader*.

Homer, *Odyssey*, XI (Merry).

Pitman, *Greek Prose Composition*.

SENIOR CLASS.

Thucydides II (Macmillan).

Homer *Iliad* I, III, *Odyssey* IX (Merry).

The Epistle to the Galatians.

Greek Grammar and Composition. The text-book used is North and Hillard.

Translation from authors not specified.

For general reading:

Jebb, *Primer of Greek Literature and Introduction to Homer*.

Maisch, *Greek Antiquities* (Temple Primers).

Bury, *School History of Greece*.

N.B.—Every member of the Senior class should make himself familiar with the outlines of Greek History at the beginning of his course. Lectures on this subject will be given during the session.

HONOURS.

Candidates for Preliminary and Final Honours in Greek should note that special stress is laid on Composition and Unseen Translation. Passages will also be set for translation from the books specified below. The Greek History required from candidates for Specialist Certificates is included in the Preliminary Honour examinations and must also be taken.

Books recommended:

- Murray, *Greek Literature; Rise of the Greek Epic*.
Goodwin, *Greek Grammar*.
Holm, *History of Greece*.
Bury, *History of Greece*.
Hogarth, *Philip and Alexander*.
Jebb, *Influence of Classical Greek Poetry*.
Butcher, *Some Aspects of the Greek Genius; Harvard Lectures on Greek Subjects*.
Lang, *The World of Homer*.
Tucker, *Life in Ancient Athens*.
Tsountas and Manatt, *Mycenean Age*.
Greenidge, *Handbook of Greek Constitutional History*.
Burrows, *Discoveries in Crete*.
Gilbert, *Greek Constitutional Antiquities*.

PRELIMINARY.

Instead of the editions mentioned below students may find it convenient to use the Teubner series.

The examination in this class must be passed at least one year before the final examination.

- Thucydides II (Marchant, Macmillan).
Plutarch, *Pericles*.
Homer, *Iliad I-IV, Odyssey V-XII* (Merry).
Euripides, *Bacchae* (Tyrrell, Macmillan).
Sophocles, *Antigone* (Jebb).
Aristophanes, *Birds* (Merry).
Greek Grammar and Composition. Sidgwick's *Greek Prose Composition* is prescribed.

FINAL.

- Herodotus I, II.
Thucydides I, II.
Demosthenes, *De Corona* (Goodwin).
Plato, *Republic I, II, III, IV* (Adam).
Aristotle, *Ethics I, II*.
Plutarch, *Themistocles, Pericles*.
Homer, *Odyssey I-XII, Iliad I-VI*.
Aeschylus, *Agamemnon* (Sidgwick).
Prometheus (Sikes and Willson).
Sophocles, *Oedipus Coloneus, Antigone* (Jebb).
Euripides, *Bacchae* (Tyrrell), *Medea* (Verrall).
Aristophanes, *Knights, Birds* (Merry).
Pindar, *Pythians* (Gildersleeve).
Theocritus, *Selections*.

Those who wish to combine Honour Greek with Honours in Philosophy may substitute for the study of Hegel either the *Republic* of Plato or the *Nicomachean Ethics* of Aristotle. In that case certain texts in the above list for Final Honours will be cancelled, namely Demosthenes, Plutarch and Theocritus.

EXTRA-MURAL STUDENTS.

The work is the same as that prescribed for intra-mural students. To each student registered in Junior or Senior Greek a paper of general instructions will be sent, along with a list of exercises in Unseen Translation and Prose Composition. These exercises must be done regularly and with the greatest possible care. Juniors and Seniors should procure North & Hillard's *Greek Prose Composition* (Rivington), without delay. Extra-mural students in Honours will receive direction individually.

PROFESSOR—J. Macgillivray, Ph.D. (Leipzig).

ASSOCIATE PROFESSOR—E. W. Patchett, B.A. (Cantab.)

TUTORS—Miss Pearl Whitton, M.A.; Miss Alma Price.

NOTE—James' German Grammar (Macmillan & Co.) is recommended to pass students.

PREPARATORY CLASS.

Students intending to take honour work in any department should have some knowledge of German. This language, however, is not studied in many high schools, so the University conducts this class for those who may want to begin German. The members of the Preparatory Class may join the Junior Class as soon as they can advantageously do so.

The work is based on the *High School German Grammar*, and *Baumbach*, *Waldnovellen*, and *Märchen*, as in the Junior Class.

JUNIOR CLASS.

The following are the works for translation and study:

Baumbach, *Neue Märchen* (*Hans Taps, Die Prinzessin, die nicht weinen konnte, Entenschnabel, Der Esel und der Kritiker, Der Osterhase, Meine liebe Mutter*).

Goethe, *Das Märchen* (Heath & Co.), "Novelle."

Writing from Dictation.

Translation at Sight.

Oral and written Composition, based on the works read.

HONOURS.

The examination in Preliminary Honours must be passed at least one year before the Final examination.

An all German dictionary should be used by honour students, Hoffmann's *Deutsches Wörterbuch*, which is inexpensive, is recommended. More complete works are the *Deutsches Wörterbuch* of Moritz Heyne and that of Weigand.

PRELIMINARY CLASS.

The following is the work for this class. It is to be read and studied in German and as German:

Gustav Frenssen, *Jörn Uhl*, I-VII.

Paul Heyse, *Vetter Gabriel, Der verlorene Sohn*.

Adolf Stern, *Die Flut des Lebens* (Wiesbadener Volksbücher).

Theodor Storm, *Der Schimmelreiter* (Ginn & Co., new edition).

Prinz von Schönau-Karolath, *Lichtlein Sind wir, Die Kiesgrube, Die Wildgänse*.

Schiller, *Maria Stuart, Gedichte* (Holt & Co.).

Goethe, *Faust I, Gedichte* (Holt & Co. [Goebel]), *Das Märchen "Novelle."*

Lessing, *Emilia Galotti*.

Otto Lyon, *Literaturkunde* 26-64 (B.C. Teubner).

Abriss der Deutschen Geschichte (Vorlesungen).

Writing German from Dictation, and Sight Translation. Oral and Written Composition, based on, or connected with, the above work.

FINAL.

Note—Candidates for M.A. standing must take I, II and III, those for Specialist standing must take I and either II or III.

Note—Students not qualifying for Teachers' Specialists standing may substitute for the works marked with an asterisk (1) Hermann Lotze, *Mikrosmus*, or (2) Kaemmel, *Werdegang des deutschen Volkes*, or (3) Fuchs, *Volkswirtschaftslehre* (Sammlung Götschen) and Hertza, *Eine Reise Nach Freiland* (Reclam).

THE GERMAN CLUB.

This Club is open to all students and meets fortnightly. Instructors and others take part in it. Its work is practical, and consists of lectures, discussions, conversation, dramatic performances, etc.

SPECIAL AND GENERAL NOTE.

No candidate will be accepted in any examination, pass or honour, who has not made the required standing in each of its essential parts. For pass classes the essential parts are: Translation into English, Translation into German and Composition, Literature, Pronunciation and Dictation. For Honours as for Pass, with the addition of Philology and Orals.

EXTRA-MURAL STUDY.

The work for extra-mural students, pass and honours, is the same as for intra-murals. In addition to the study (translation or reading) of the prescribed texts, special exercises, subjects for composition, etc., will be sent to students during the session. General instructions will be sent on registration. Regular and sustained work is expected throughout the session.

ROMANCE LANGUAGES AND LITERATURE.

PROFESSOR—P. G. C. Campbell, M.A. (Oxon.).

ASSOCIATE PROFESSOR—E. W. Patchett, B.A. (Cantab.)

ASSISTANT PROFESSOR—R. E. J. Davis, M.A. (Oxon.).

TUTORS—F. A. Whitton, B.A.; J. F. Smith.

FRENCH.

Note for all classes:—(1) No good work in French can be done without a large dictionary. Small pocket editions are worse than useless. One written entirely in French is best, and *Le Petit Larousse Illustré*, while recommended for all classes, is indispensable for Honour students. Those who find they require an English-French Dictionary may try that of El-wall or of Gasc (*Concise Dictionary*, Holt & Co.).

(2) The following books are recommended to those who are desirous of studying systematically and scientifically the correct pronunciation of French:—

Nicholson, *Introduction to French Phonetics* (Macmillan).

Passy, *Sounds of the French Language* (Clarendon Press).

PREPARATORY CLASS.

Those who have not passed Junior Matriculation in French, or its equivalent, must take the Preparatory Class. Only those who pass the Matriculation examination at Christmas may take the Junior examination in April. Those passing in April may take the Junior examination in September, if they take the Junior class intra-murally in the summer.

JUNIOR CLASS.

EXTRA-MURAL STUDENTS.

There are tutorial courses for extra-mural students in Junior, Senior, and Honour English. The subjects of study are the same as those prescribed for intra-mural students. Extracts from Professor Cappon's lectures are sent regularly to extra-mural students in all the classes for the purpose of indicating the range and standard of work required and the methods of analysis and criticism used. Along with the extracts are sent directions for study and questions on the work prescribed. The exercises must be written promptly and forwarded to the Tutor in English for correction. To supplement this instruction, students in Senior English and in Anglo-Saxon will find it necessary to use the following manuals:

SENIOR CLASS.

Corson, *Primer of English Verse*.
Saintsbury, *Historical Manual of English Prosody*.

ANGLO-SAXON.

Emerson, *The History of the English Language*.
Ten Brink, *Early English Literature* (Book I).

HISTORY.

PROFESSOR OF MODERN HISTORY—J. L. Morison, M.A.

PROFESSOR OF COLONIAL HISTORY—W. L. Grant, M.A.

TUTOR—J. C. Macfarlane, B.A.

ENGLISH HISTORY.

The work of the class will include a study of three periods of English History, the general text-book being J. R. Green, *A Short History of the English People*.

- I. EARLY BRITAIN, a discussion of the Celtic, Roman and Anglo-Saxon periods. As the general text-book is inadequate on the earlier period, students should consult such books as Rhys, *Celtic Britain*, or Oman, *England before the Norman Conquest*. Special stress is laid on the study of Early English institutions.
- II. MEDIÆVAL CONSTITUTIONAL HISTORY, from 1066 to 1272, with lectures also on The Crusades and Chivalry, The Development of the Mediæval Church, and certain features in the growth of English social life. The most important book on this period is H. W. C. Davis, *England under the Norman and Angevin Kings*.
- III. POINTS TAKEN FROM THE CONSTITUTIONAL DEVELOPMENT OF ENGLAND between 1603 and 1832—the text-book being J. R. Green, *op. cit.*

ESSAYS.—For extra-mural students four essays are compulsory, for intra-murals three.

Nov. 1st.—*The Celtic element in early English History*; its characteristics, and its influence down to the conquest. The books mentioned above, by Rhys and Oman are useful. Matthew Arnold's essay on *Celtic Literature* is suggestive. Elton, *Origins of English History* may be referred to.

Dec. 2nd.—*Anglo-Saxon Influences in the Constitution after the Norman Conquest*.

Books:—The early chapters of Davis; Stubbs, *Constitutional History*, Vol. I; Maitland, *Domesday Book and Beyond*, Essay I.

Jan. 16th, 1913.—*The Crusades and the System of Chivalry illustrated from the career of Richard I.*

Books:—Davis, the chapters on Richard; *The Crusades* (Story of the Nations series); *The Crusade of Richard I* (English History from contemporary writers); Stubbs, *Introductions to the Rolls Series*.

Feb. 7th.—*The Importance of Chatham in Eighteenth Century Constitutional History.*

Books:—F. Harrison, *Chatham*; W. D. Greene, *Pitt* (Heroes of the Nations); Von Ruville, *William Pitt, Earl of Chatham*; Lecky, Vols. 2 and 3, with reference to his great ministry, the Middlesex election, and the American Revolution.

MODERN HISTORY.

This class may be taken either under Professor Morison, with special emphasis on the domestic and foreign relations of England and Europe, or under Professor Grant, with special emphasis on colonial development. For all University Honours and Degrees the two classes are of equal value.

1.—EUROPEAN.

Three periods of European History are studied in rotation in this class:—The Renaissance and Reformation; The Ascendency of France from Henry IV to Napoleon; and Modern Europe, 1789-1900.

The subject for 1912-13 is *The Renaissance and Reformation*, with special reference to events in the Sixteenth Century. No single volume includes all that comes within the scope of the class. Johnston, *Sixteenth Century Europe* approaches most closely to the requirements. The following sectional text-books are prescribed:—

For the History of the Papacy, Barry, *The Papacy and Modern Times*, pp. 1-133 (Home University Library).

For the Protestant Reformation, Seebohm, *The Protestant Reformation*.

For the Italian Renaissance, Machiavelli, *The Prince* (Everyman's Library).

With regard to the history of the separate countries, Green's *Short History* may stand for England, Hume's *Philip II* (European Statesmen) for Spain, and Harrison's *William the Silent* for Holland.

Volumes I, II, and III of the Cambridge Modern History should be consulted for all essay subjects, and as books of general reference.

Essays—Extra-mural students are required to do four essays, intra-murals three.

Nov. 5th.—*Erasmus and Luther—a Contrast in Reformation Methods.*

Books:—Seebohm; Froude, *Short Stories*, Vol. I; Emerton, *Erasmus*; T. M. Lindsay, *Luther*, and *History of the Reformation*, Vol. I, or an equivalent Catholic work.

Dec. 3rd.—*Renaissance Political Morality, illustrated from Machiavelli's Prince.*

Books:—*The Prince*; The Cambridge Modern History, Vol. I, chap. 6;
Lord Morley, *Machiavelli*; Villari, *Life and Times of Machiavelli*.

Jan. 18th, 1913.—*The Sixteenth Century Man of Action*; illustrated either
from the life of Francis Drake, or of Henry of Navarre.

Books:—Julian Corbett, *Drake and the Tudor Navy*; Froude, *English
Seamen*; Drake's voyages—from Hakluyt's collection; *Henry of
Navarre* (Heroes of the Nations); C. M. H. Vol. III, Chap. 20;
Motley, *The United Netherlands* (consult index under Henry IV
of France).

Feb. 18th—*William the Silent, an estimate of his influence on later Sixteenth
Century Europe*.

Books:—Harrison, *William the Silent*; Ruth Putnam, *William the Silent*;
Motley, *The Rise of the Dutch Republic*; C. M. H., Vol. III, Chaps.
6, 7, and 19.

2.—COLONIAL.

Students will be examined on:—

Bourne, E. G., *Spain in America*.

Egerton, H. E., *A Short History of British Colonial Policy*, pp. 1-255.

Egerton, H. E., *Canada, 1763-1901*. (Vol. V, part II of Lucas' Historical
Geography of the British Colonies), pp. 1-274.

Lord Durham, *Report on Canada*. (Most easily accessible in Methuen's
reprint of 1902).

Lectures will be given on the general course of colonial development up
to 1783, treating of the European situation in the XV Century, the voyages
of discovery, the growth of theories of colonization, Spain, France and Eng-
land in America, the Old Colonial system and its breakdown after the Seven
Years' War, the American Revolution. The History of Canada will then be
taken up in outline from 1763 to 1867.

Essays.—For extra-mural students four essays are compulsory, for intra-
murals three. A list of subjects and of authorities, with the dates on or be-
fore which they must be handed in, will be furnished to students on applica-
tion.

PRELIMINARY HONOURS.

This is a joint class, conducted by both professors.

I Professor Morison will lecture, in alternate years on:

(a) *Seventeenth Century British History, Political, Constitutional and
Diplomatic*, and

(b) *Eighteenth Century British History*.

For the session of 1912-13 the subject will be, The Seventeenth Century.
The earlier lectures will deal with the Puritan Movement, the constitutional

changes of the Great Rebellion and the career of Oliver Cromwell. The later lectures will discuss British Foreign Policy beginning with Cromwell and carrying the subject on until 1878. While the text-books by Trevelyan and Seeley are specially recommended, students will find additional aid in Corbett's volumes on the Seven Years' War and J. H. Rose's *Life of Napoleon*, more especially for essay purposes.

The text-books are:—

Carlyle, *The Letters and Speeches of Oliver Cromwell*.

G. M. Trevelyan, *England in the Age of the Stuarts*.

Sir J. Seeley, *The Expansion of England*.

II. Professor Grant will lecture in alternate years on:

(a) *British Colonies and Colonial Policy*, 1651-1783.

(b) *British Colonies and Colonial Policy*, 1783-1900.

During the session 1912-13 Professor Grant will lecture on:

British colonies and colonial policy, 1651-1783. Students will be expected to show a general knowledge of the internal and diplomatic history of the United Kingdom during this period, and a detailed knowledge of the following books:

Egerton, H. E., *Short History of British Colonial Policy*, pp. 1-233.

Hart, A. B., *American History told by Contemporaries*, Vol. II, 1689-1783 (Macmillan).

Burke, Edmund, *Speeches on American Taxation, and on Conciliation with the colonies* (edition recommended: E. J. Payne, Clarendon Press).

Lecky, *The American Revolution* (Appleton).

Students will be required to write four essays, one of which, to be selected from the following list of subjects, must be sent in by intra-mural students on or before 23rd October.

(1) The character of Cromwell, according to Carlyle.

(2) The Character of William III, according to Macaulay.

(3) Forces making for union in the American colonies between 1651 and 1763. Consult Hart, *op. cit.*

(4) Had Burke an adequate solution for the Imperial problem?

FINAL HONOURS.

In this class, students will specialize, either on the British, or on the Colonial side; but they may elect from the other side a topic, or section, equivalent to the amount required for a single examination paper.

I.—BRITISH HISTORY.

The intention in this department is to offer such subjects in British History as shall complete the studies begun in the earlier classes. Students may exchange section (1) or (2) below, for any section offered in the department of Colonial History.

- (1) *The History of British diplomacy from Cromwell to the Congress of Berlin.* Dependence here must be placed chiefly on the lectures; but Seeley's *Expansion of England*, and chapters on foreign policy in McCarthy's *History of Our Own Times* are useful.
- (2) *The Constitutional History of the Seventeenth Century.* See the books recommended under the heading Preliminary Honours I. Students will attend the lectures delivered, on this subject, to the Preliminary Honours class.
- (3) The main subject of study will be *Victorian England*. The work already done in Morley's *Life of Gladstone* will be of great use here; but the chief emphasis will be thrown on study of the following books:—

Lord Morley, *Life of Cobden*.

John Bright, *Speeches* (Everymans' Library).

Beaconsfield, *Life of Lord George Bentinck*.

J. H. Newman, *Apologia pro vita sua*.

J. A. Froude, *Life of Thomas Carlyle*.

G. M. Trevelyan, *English Songs of Italian Freedom*.

II.—COLONIAL HISTORY.

A. Canada under the French Regime—one paper.

B. Canada, 1763-1841—two papers.

C. The colonial section of Preliminary Honours not already taken—one paper.

For section A or C an equivalent may be substituted from Professor Morison's work.

Books recommended:

A. Ferland, *Histoire du Canada*.

Parkman, *Opera omnia*, omitting *The Oregon Trail*.

Munro, W. B., *The Seigniorial Tenure in Canada*.

Wood, W., *The Fight for Canada*.

Lucas, Sir C., *Canada* (Historical Geography of the British Colonies, Vol. V, Part I: The Clarendon Press).

B. Munro, W. B., *op. cit.*

Egerton, H. E., *Canada* pp. 1-190 (Historical Geography of the British Colonies, Vol. V, Part II: The Clarendon Press).

Lord Durham, *Report on Canada*.

Selected Documents from:—

Shortt and Doughty, *Canadian Constitutional Documents, 1759-1791* (Ottawa, Canadian Archives).

Egerton, H. E. and Grant, W. L., *Canadian Constitutional Development* (Murray).

Houston, W., *Documents illustrative of the Canadian Constitution.*

C. The same as for Preliminary Honours, Colonial.

In the following session, *i.e.*, 1913-14, the work will be as follows:

A. The United States, 1776-1876—one paper.

B. Canada, 1837-1891—two papers.

C. The colonial section of Preliminary Honours not already taken—one paper.

Economics and Politics may be taken during the same session. In both classes essays will be prescribed.

HONOURS.

The two years' work in Honours will be spent in the study of some of the more significant theoretical and practical problems in Economics, Politics and Sociology. Special attention will be given the Canadian aspect of each question. So far as possible, term reports, assigned individually, and class discussions will be utilized to encourage independent work. Conferences will be held for the informal discussion of current economic and political topics.

In their first year in Honours, students will be examined on the Preliminary work prescribed; in their final year, on both the Preliminary and Final work prescribed for that session—the Preliminary class covering different ground in the two years. A thesis embodying independent work in some section of the Honour course will be required from every candidate for Final Honours.

PRELIMINARY AND FINAL.

1. NATIONAL PROBLEMS. A lecture course, designed to afford a brief introduction to current issues, with suggestions for further study. The topics discussed will include conservation of resources, national unity, race problems, immigration, city planning, rural organization, popular control of government, and imperial relations.

First term. Professor Skelton.

2. CANADIAN CONSTITUTIONAL LAW. Chiefly a study of the British North America Act and of the leading cases bearing on the powers of the Dominion and the Provinces.

Clement, *The Law of the Canadian Constitution*, or
Hassard, *Canadian Constitutional Law*, and assigned readings.

Second term. Professor Skelton.

3. PUBLIC FINANCE AND TAXATION. An examination of the theory and practice of taxation and expenditure, involving an attempt to outline an adequate system of national, provincial and local taxation.

Plehn, *Introduction to Public Finance*.

First term. Professor Swanson.

4. ECONOMIC THEORY. A study of the development of economic thought, in its relation to the general thinking and the political and industrial conditions of the day. A detailed study will be made of Adam Smith's *Wealth of Nations*.

Haney, *History of Economic Thought*, and
Adam Smith, *The Wealth of Nations*.

First and second term. Professor Swanson.

FINAL.

1. INTRODUCTION TO SOCIOLOGY. The nature and scope of sociology, considered especially as a study of the factors in social development.

Carver, *Sociology and Social Progress*.

First and second term. Professor Skelton.

2. IMPERIAL PROBLEMS: 1. Australasia. A study of the Australian and New Zealand Political and economic situation, including discussion of the working of federal government in Australia, the Labour Party and labour legislation, land systems, the Asiatic question, and imperial relations.

Wise, *The Commonwealth of Australia*, and
Schofield, *New Zealand in Evolution*.

First term. Professor Swanson.

3. COMPARATIVE NATIONAL GOVERNMENT: 2. Continental Europe. The form and actual working of the governments of France, Germany, Italy, Austria-Hungary and Switzerland.

Lowell, *Governments and Parties in Continental Europe*.

Second term. Professor Skelton,

SESSION OF 1913-1914.

PRELIMINARY AND FINAL.

1. Municipal Government.
2. Comparative National Government: The United Kingdom.
3. Money and Banking.
4. Labour Problems.

FINAL.

1. Corporation Finance.
2. Imperial Problems: 2. South Africa.
3. Socialism.
4. English Political Theory since Bentham.

EXTRA-MURAL STUDENTS.

In each of the Pass classes a series of exercises will be provided, containing notes on the texts and questions to be answered as concisely as possible. Scope for more extended discussion will be found in the essays prescribed; in the preliminary instructions sent to all students on registration, detailed lists of books helpful in the preparation of the essays are given.

ECONOMICS.

Candidates will be examined on the following books:

Ely's *Outlines of Economics*.

Cheney's *Industrial and Social History of England*.

Essays during session 1912-13: Two of the following:

Economic Features of the Student's Neighborhood.

The Place of Banks and Railroads in developing a new country.

Should the United Kingdom adopt the policy of Imperial Preferential trade?

POLITICS.

Candidates will be examined on the following books:

Leacock's *Elements of Political Science*.

Pollock's *History of the Science of Politics*.

Essays during session 1912-1913:

1. On Leacock: either, Party Government, or, The Bicameral System.
2. On Pollock: either, Machiavellianism in National and International Politics, or, The Development of the Social Contract Theory.

HONOURS.

The course prescribed will be the same as in the case of intra-mural students. Critical notes will be provided. In the Preliminary class essays will be assigned individually. Final Honour candidates will be required to present a thesis embodying independent work in some special field.

MATHEMATICS.

PROFESSOR—J. Matheson, M.A.

ASSISTANT PROFESSOR—D. Buchanan, M.A., Ph.D.

ASSISTANT PROFESSOR—C. F. Gummer, M.A.

LECTURERS—D. S. Ellis, M.A., B.Sc.

J. A. Workman, M.A.

TUTOR—F. M. Wood, M.A.

A time-table for Intermediate and Final Honours will be posted at the beginning of the session.

JUNIOR CLASS.

ALGEBRA.—The theory and practice of Algebra to the Binomial theorem inclusive. Dupuis, *The Principles of Elementary Algebra*—the first thirteen chapters, omitting chapter XI.

Sec. I, Wed. 2-3; Sec. II, Fri. 3-4; Sec. III, Mon. 3-4.

Professor Buchanan.

GEOMETRY of the point, line and circle in the plane. Dupuis, *Elementary Synthetic Geometry*, parts I, II, III.

Sec. I, Mon. 2-3; Sec. II, Wed. 3-4; Sec. III, Fri. 3-4.

Professor Matheson.

TRIGONOMETRY. Decimal approximation and contracted methods; angular measurement, trigonometric functions and their relations; graphs; cosine and sine formulas; solution of triangles; orthogonal projections; statical applications; addition theorems, multiple and sub-multiple angles. Dupuis' *Plane Trigonometry*.

Besides numerous class-exercises, periodical written exercises will be required.

Sec. I, Fri. 2-3; Sec. II, Mon. 3-4; Sec. III, Wed. 3-4.

Professor Gummer.

SENIOR CLASS.

ALGEBRA. The progressions; annuities; binomial theorem; indeterminate coefficients with applications to partial fractions, expansions, &c.; continued fractions; logarithms; exponentials; summation of series.

Dupuis, *The Principles of Elementary Algebra*, Chap. XII to end.

Mon. 8-9. Mr. Workman.

GEOMETRY.—(a) Solid Geometry.

Dupuis, *Elements of Synthetic Solid Geometry*, the first 131 pages.

(b) Elementary Coordinate Geometry—Coordinate systems; graphing relations between curves and equations; coordinates of special points; the equations and simple properties of the conic sections.

Wed. 11-12. Mr. Ellis.

TRIGONOMETRY—Preceding De Moivre's theorem. Dupuis' *Plane Trigonometry*.

Thurs. 8-9. Mr. Workman.

Besides numerous class-exercises, periodical written exercises will be required.

HONOURS.

Candidates who matriculate with Honours in Mathematics are not required, in their subsequent Honour Course, to take either the Junior or the Senior Class, but they are advised to read the Geometry of the Junior Class.

Candidates who do not matriculate with Honours must take the Junior Class as preparatory to their Honour work, but they need not take the Senior Class inasmuch as the work of this class is covered in the first group of Honour subjects.

PRELIMINARY.

GROUP I.

1. SYNTHETIC MODERN GEOMETRY. (a) PLANE—Modern ideas in geometry; geometric continuity; relation of geometry to algebra; geometric extensions; ranges and pencils of four; collinearity and concurrence; triangles in perspective; inversions and inverse figures; pole and polar; radical axis.

Dupuis, *Elementary Synthetic Geometry*, to page 237, omitting Sec. II, of Part IV. Reference to Durell, *Plane Geometry*.

(b) SOLID.—Lines and planes in space; dihedral angles; the three-faced corner; Euler's formula for polyhedra; areal relations; spheres; radical planes, prismoidal formula.

Dupuis, *Elements of Synthetic Solid Geometry*, the first 131 pages.

Mon. 3-4, Wed. 11-12. Professor Matheson.

2. ALGEBRA: The progressions; permutations and combinations; binomial theorem; remainder theorem; solution of numerical equations with incommensurable roots; inequalities; undetermined coefficients and various applications; partial fractions, expansion of functions, etc.; continued fractions; logarithms; exponential and logarithmic series; recurring series; difference series; interpolation; summation of series; convergence of series; elementary determinants and their application to the solution of linear equations.

Dupuis, *The Principles of Elementary Algebra*.

Thurs. 11-12. Professor Gummer.

3. TRIGONOMETRY I: Contracted methods with decimals; radians and degrees; trigonometric functions; interrelation of functions; variation of functions with increase of angle; graphs; solution of right-angled triangles; orthogonal projection; addition formulæ; transforming sums into products, and vice versa; multiple and submultiple angles; applications to triangles, quadrangles and regular polygons; tables of functions, natural and logarithmic; logarithmic formulæ; inverse functions; solution of trigonometric equations; limits and approximations; series for sine and cosine. Numerous exercises.

Hobson and Jessop, *Plane Trigonometry*.

Fri. 3-4. Mr. Workman.

4. CO-ORDINATE GEOMETRY AND CALCULUS I. (a) *Co-ordinate Geometry*.—Co-ordinate systems; rectilinear and polar and their interrelations; co-ordinates of distinctive points; point at infinity; the straight line; standard equation; perpendiculars, bisectors, etc.; relations of two or more points and lines; collinearity and concurrence; the triangle and the quadrangle; translation of origin. Equations of two dimensions; factorization and the discriminant. Equations of the conic sections. The circle, with its secant and tangent lines; inverse points and inversion; pole and polar; conjugate points; conjugate figures; Salmon's theorem; radical axis and centre; systems of coaxial circles.

Loney, *Co-ordinate Geometry*.

Smith, *Conic Sections*.

(b) *Calculus*.—Limits; functions; the differential co-efficient and rules for finding it; measurement of rates; motion in curved paths; implicit functions and partial derivations; simple problems on maxima and minima; tangents and normals; fundamental integrals; integration by parts; simple areas and volumes.

INTERMEDIATE.

GROUP II.

5. SYNTHETIC MODERN GEOMETRY. (a) *Plane*.—Mean centres of points and multiples; centres and areas of similitude; harmonic and unharmonic ratios, with various applications; theorems of Pascal and Brianchon; polar reciprocation; homography and involution.

Dupuis, *Elementary Synthetic Geometry*.

Reference to Durell, *Plane Geometry*.

(b) *Solid*.—Figures of translation and revolution; mean centres; Guldinus' theorems; developable surfaces; perspective projections; an harmonic relations, conic sections and properties; theorems of Appollonius; Spheric geometry; polar triangle; spherical excess; cases of ambiguity.

Dupuis, *Elements of Synthetic Solid Geometry*.

One hour per week.

6. CO-ORDINATE GEOMETRY AND CALCULUS II. (a) *Co-ordinate Geometry*.—The parabola with its tangents and normals; centre of curvature; equation with one variable &c.; general conic; asymptotes; conjugate axes; theorem of Appollonius, and other theorems; ellipse and hyperbola; tangents, normals and pedals; eccentric angle; problems and exercises.

One hour per week.

(b) *Calculus*.—Implicit functions and partial derivatives; Euler's theorem on homogeneous functions; tangents and normals; pedal equations; asymptotes; successive differentiation; Leibnitz's theorem; differential equation; Taylor's and Maclaurin's series; maxima and minima; radius of curvature; evolute; definite integrals; areas, lengths of curves, volumes and surfaces; centres of gravity, moments of inertia.

7. SPHERICAL TRIGONOMETRY AND ASTRONOMY.—Three-faced corner and spheric triangle; polar triangle; limits of sides and angles; spherical excess; deduction of formula, cosine formula, sine formula, cotangent formula, geometric meaning of $\sin A \sin b \sin c$. Havre-sine formula; DeLambre's equations; Napier's analogies; solution of triangle; Napier's circular parts and applications, etc.

A spherical earth; mean radius; distances along a great circle, parallel of latitude, loxodrome; surveying a great circle, a parallel of latitude; projection of the sphere, stereographic, conical, globular, Mercator's; meridional parts.

A spheroidal earth; angle of the vertical; true radius vector.

Finding the meridian, latitude, time, etc.; solar, sidereal, and mean time, equation of time.

General descriptive and practical astronomy.

Dupuis and Matheson, *Spherical Trigonometry*.

Barlow and Bryan, *Mathematical Astronomy*.

One hour per week.

8. DETERMINANTS AND THEORY OF EQUATIONS.—Determinants; matrices and their transformations; multiplication of matrices; reciprocal determinants; skew and skew-symmetric determinants; circulants; continuants; various applications.

General equation and its graph; Descartes' rule of signs; symmetric functions; binomial equations; transformations; reciprocal equation; the cubic and the biquadratic; real and imaginary roots; solution of numerical equations; Horner's method of approximation; theorems of Fourier, Budan and Sturm; methods of elimination.

Weld, *Elements of Determinants*.

Burnside and Panton, *Theory of Equations*.

One hour per week.

9. ALGEBRA II.—Convergency of series; infinite products; limits of infinite series; summation; continued fractions, convergents and intermediate convergents; general continued fractions; indeterminate linear and quadratic equations; theory of numbers; theorems of Fermat, Lagrange, and Wilson; probability, expectation, local probability, etc.

Hall and Knight, *Higher Algebra*.

Chrystal, *Textbook of Algebra*.

One hour per week.

FINAL HONOURS.

GROUP III.

10. ANALYTIC SOLID GEOMETRY.—Notation, direction, angles, etc.; oblique coordinates and ppd.; the line and the plane in space; conicoids to principal axes; generating lines and ruled surfaces; surfaces of revolution; tangent planes; curves of section; confocal conicoids; general equation and its transformations; rotation of axes; invariants; circular sections and umbilici; sections of the conicoids by a plane; axes and area of the section; curvature of surfaces; indicatrix, Meunier's theorem; study of tangent planes, tangent cone, normal planes, radius of curvature, etc., through partial derivatives; study of curves in space, Quetelet's theorem.

Reference to Aldis, Smith, Salmon.

One hour per week for half the session and two hours per week for the other half.

11. CALCULUS II:—Partial differentials, n th differentials; Leibnitz's theorem; expansion of functions; various theorems; change of independent variable. Theory of plane curves; tangents, normals, etc.; intersection of curves; polars; pedals; tangentials; inverse curves; polar reciprocals; asymptotes; singular points, nodes, cusps, conjugate points, multiple points, etc.; order of contact; curvature; conic with 3rd order contact; envelopes; caustics; singular forms; max. and min., with two independent variables; LaGrange's criterion.

Integrable forms; hyperbolic functions; areas; lengths of curves, volumes and surfaces; double and triple integration; formulæ of reduction; Pappus' theorems; moment of inertia, etc.; definite integrals and Fourier's series; beta and gamma functions; elliptic integrals.

Edwards, *Differential Calculus*.

Williamson, *Integral Calculus*.

Two hours per week.

12. DIFFERENTIAL EQUATIONS.—Nature and origin of differential equations; equations of first order and degree; exact equations; integrating factors; geometrical interpretations; singular solutions; discriminants and special loci; equations of first order and higher degree; Clairaut's form; applications to geometry and physics; intrinsic equations; trajectories; equations of 2nd order; general linear equation with constant coefficients; operator $D+a$; symbolic methods; homogeneous linear equations; special cases; solution in series; simultaneous and partial differential equations.

Johnson, *Treatise on Ordinary and Partial Differential Equations*.

One hour per week for half the session and two hours per week for the other half.

14. TRIGONOMETRY II.—Series for n th powers of $\sin a$ and $\cos a$; De Moivre's theorem; Argand's diagram and complex quantity; properties of V function; series for $\cos na$ and $\sin na$; roots of a complex; trigonometric functions expressed in series; series for circular functions; expansion in Bernoullian numbers; factorization of binomial of n dimensions, and of quadratic trinomial of $2n$ dimensions; sine and cosine in factor series; certain series; expansion in trigonometric series; summation of trigonometric series; numerous exercises; introduction to vector analysis.

Lock, *Higher Trigonometry*.

One hour per week.

GROUP IV.

QUATERNIONS.—Vectors; addition and subtraction of vectors; multiplication and division of vectors; the quaternion; quaternion analysis; 3 or more vectors; applications to line and plane, to circle and sphere, to ellipse and ellipsoid. Investigations of vector equations of tangents, normals, evolutes, tangent plane, tangent cone, etc.; numerous exercises.

Kelland and Tait, *Quaternions*.

One hour per week.

15. CONICS II.—General equation and its parameters; transformations; diametral lines; conjugate diameters; rotation of axes; invariants and their meaning; intersecting chords; contact of conics; osculation; constructions for r ; evolute; trilinears and contracted methods; harmonic properties of triangle and quadrangle; triangles in perspective; trilinears of 2nd order; discussion of leading equations; harmonicism; inscribed and circumscribed conics; self-conjugate triangle; tangential co-ordinates; circular points at infinity; foci; conics having double contact; conics fulfilling certain conditions; Pascal's and Brianchon's theorems; contact and intersection of conics; anharmonic relations; degraded conics and rectilinear hyperbola; envelopes.

Salmon, *Conic Sections*.

Two hours per week.

16. ELEMENTARY THEORY OF FUNCTIONS.—Geometrical representation of complex numbers; fundamental operations; i , ω , etc., as operators; linear transformations; invariant points; anharmonic ratios; the general rational transformation; the differential coefficient; monogenic functions; geometrical representation of multiple-valued functions; the trigonometric, logarithmic, and exponential functions and transformations; stereographic projection; Mercator's projection; conformal representation; integration; holomorphic functions; Cauchy's theorems on integration, with various applications; convergence of complex series; Cauchy's extension to Maclaurin's and Taylor's theorems; various expansions; the power series; zeros and poles; singular points; meromorphic functions; Laurent's theorem, and applications; expansion of multiple-valued functions; Riemann's surfaces.

Reference to Harkness and Morley, Durige, Forsyth.

One hour per week for half the session and two hours per week for the other half.

17. FINITE DIFFERENCES.—Fundamental operation; differences of the powers of zero; expansion in factorials; symbols of operation; Herschel's theorem; inverted Maclaurin's theorem; interpolation; LaGrange's formula; methods of approximation; statistical applications; mechanical quadrature; finite integration; exact summation of series; Euler-Maclaurin sum series; approximate summation; increase of convergency.

Boole, *Finite Differences*.

One hour per week for half the session.

The preliminary group, taken as a part of a pass course, will be allowed for Senior Mathematics, provided that in the examination the candidate makes at least 33 per cent. on each subject, and an average of 40 per cent. on the whole group. But for Preliminary Honours, candidates must make at least 40 per cent. on each subject, and an average of 60 per cent. on the whole group, at one examination.

For Intermediate Honours candidates must make at least 40 per cent. on each subject of the intermediate group, and an average of 60 per cent. on the whole group, at one examination.

Candidates must take Preliminary Honours before taking Intermediate Honours, and Intermediate Honours before taking Groups III and IV for Final Honours.

Of groups III and IV only one can be taken in the third year of the honour course, and the remaining one, or both, may be taken in the fourth year. Final Honours will be determined by the average of the marks made on groups III and IV, but candidates for the University medal must write on both groups in the same year.

Candidates will not be allowed to write on preliminary and intermediate examinations in the same year. But a student may attend any course of lectures for which, in the opinion of the department, he is qualified.

EXTRA-MURAL STUDENTS.

The work for extra-mural students is the same as that for intra-murals, except in the matter of exercises.

The Mathematical Department has issued a book containing a very large number of exercises, covering the work of the Junior, Senior, and Preliminary Honour group of subjects, and to a considerable extent the work of the Intermediate Honour group. The extra-mural student must supply himself with a copy of this book, which will be forwarded by the Registrar on receipt of \$1.00, and exercises will be mainly prescribed from it by giving section and number. Exercises must be returned on or before the dates specified.

Work on the exercises will be estimated according to the number successfully done.

JUNIOR CLASS.

The work of the Junior Class is elementary, forming the introduction to the subject of Physics. In it the fundamental principles are developed and extended far enough to give a fairly complete elementary knowledge of the entire subject to those for whom it is the only class in Physics. It is the purpose in this class to lay a thorough foundation for subsequent work in theoretical, experimental and technical Physics and for teaching, hence it is planned particularly to familiarize the student with the fundamental knowledge of elementary Mathematics only.

The class is required in Pass Courses II, III, and IV, in the Inspector's General Proficiency Course, in Specialist Courses VII and VIII and in the M.A. Courses B and C. It is optional in Pass Course I and in Specialist Courses I, II, III, IV, V, and VI.

The work of the class is divided for convenience into three parts, viz., (A) Mechanics, (B) the subjects of Electricity, Magnetism, Wave Motion, Sound, Light, and Heat, and (C) the experimental work in the laboratory.

A. MECHANICS.—The work of this section involves an examination of those phenomena of matter and motion which are familiar to every one. From a consideration of these, the class is led to establish inductively the more important laws governing the relation of matter and energy. By solving both in and out of class many problems drawn from actions of daily occurrence the student is enabled to see the working of the great principles in the phenomena about him, thus coming to a better understanding of the laws of Nature. In this way the student lays a foundation for the further study of natural phenomena.

Text-book—Porter, *Intermediate Mechanics*.

Tues. 12-1. Professor W. C. Baker.

B. ELECTRICITY, MAGNETISM, WAVE MOTION, SOUND, LIGHT AND HEAT.—These lectures are given twice weekly throughout the year. The subjects considered are Static Electricity, Current Electricity, Wave Motion, Sound, Light and Heat, which subjects are discussed both mathematically and experimentally. The lectures are very fully illustrated by suitable experiments.

Independent effort on the part of the student is considered essential to a proper understanding of the fundamental principles of this work; hence many problems are given for solution during the course.

This course of lectures is of a very general character, and should be of great cultural value to students not especially interested in pursuing work along lines of pure or applied Science.

Text-books are:—

S. P. Thompson, *Elementary Lessons in Electricity and Magnetism*.

Other texts to be announced at the beginning of the session.

Tues. and Thurs., 3-4. Professor Kalmus.

C. LABORATORY.—Each student is required to spend two hours per week in the laboratory, performing experiments designed to train him in the manipulation of apparatus, to teach him to make accurate measurements and to give practice in properly recording, reducing, and interpreting, experimental data. The laboratory course is a most valuable part of the work, supplementing as it does the work of the lectures and giving a better understanding of the principles of the subject.

Text-books and hours to be arranged at the opening of the session.

SENIOR CLASS.

The work of this class, while partly review of that of the Junior class, is largely a continuation of the work of that class. In it more attention to the theoretical side of the subject is given, topics are treated more in detail and many things are discussed which on account of their advanced nature are omitted from the work of the Junior Class. Together with the Junior Class it gives an extended knowledge of physical phenomena and affords a very satisfactory equipment for all except Specialists in Science or Mathematics.

This class is required in Specialists' Course VI, VII, VIII; in Inspector's General Proficiency Course; in M.A. courses B, and C, and is optional in Pass Courses I and II.

The work is divided for convenience into four parts, viz.: (A) Mechanics, (B) Heat and Light, (C) Electricity and Magnetism, and (D) Experimental work in the laboratory.

A. MECHANICS.—The work in this section is an extension of that done in the Junior Class, treating less simple parts of the subject and dealing with Dynamics of Rotation. The aims and the methods are the same as in the Junior Class.

Thurs. 9-10. Professor W. C. Baker.

B. HEAT AND LIGHT. In the first part of the work of this section more attention is given to a detailed study of Calorimetry, Thermal Properties of Matter, Radiation, and the Mechanical Theory of Heat than can be given in the Junior Class. In Light the subjects of Vibration and Wave Motion are

studied in detail and fairly complete treatments of Refraction, Dispersion, Double Refraction and Polarization are given. The lectures in Light are illustrated very fully by experiments.

Tues. 9-10. Professor Clark.

C. ELECTRICITY AND MAGNETISM.—While this is an elementary course, selected parts of the subject are treated in greater detail than in the Junior Class. Throughout the course special emphasis is laid on the importance of *quantitative definitions* and on the *absolute* measurement of quantities. An attempt is made to acquaint the students with some of the recent developments of the subject by a discussion of such topics as Conduction of Electricity through Gases and Radio-activity.

The text-book used in all the above sections is:—

Duff, *Text Book of Physics.*

Mon. 9-10. Mr. Robertson.

D. LABORATORY.—Each student is required to spend two hours per week in the laboratory, the experiments being arranged so as to form a continuation of those of the Junior Class and to supplement the work of the lectures wherever possible. Opportunity is given for additional laboratory work to those who desire it.

Text-book and hours to be arranged at the opening of the session.

HONOURS.

NOTE.—All Honour classes in Physics must be taken at the University.

PRELIMINARY.

Students should have taken Senior Physics and Group I of Honour Mathematics before entering this class.

The work is divided into four sections, in each of which an examination is given. It constitutes the introductory course in Mathematical Physics. Since the Calculus is taken by the student at the same time that he is attending the lectures of this class, the notation and the methods of the Calculus are introduced early and are used freely throughout the work.

This class is required in Specialist Courses VI and VII and in M.A. course B.

Candidates for Honours in Mathematics and Physics must make a minimum of forty per cent. in each subject of the Preliminary Honour class and an average of sixty per cent. upon the whole group. Not more than one subject of the Preliminary Honour class may be carried over into the Final Honour year.

I. MECHANICS.—This course is designed to give the student a thorough training in the principles of Mechanics as a basis for subsequent work in Physics, for research or for teaching. The work begins with a discussion of the motion of a point and the mathematical statement of Newton's laws, and considers further the dynamics of a particle and of rigid and deformable bodies. In the latter part of the course the motion of fluids is considered and the hydrokinetic differential equations of Euler are discussed.

The text-book is, Crew, *The Principles of Mechanics*.

Fri. 10-11. Professor Kalmus.

II. HEAT AND LIGHT.—The work in Heat consists of a course of ten lectures on the fundamental laws of thermodynamics and the thermodynamic scale of temperature. In Light, the work consists of fourteen lectures on the Fresnel-Huyghens theory of interference.

Wed. 1-2. Professor W. C. Baker.

III. ELECTRICITY AND MAGNETISM.—This course includes an introduction to the Mathematical Theory of Electricity and Magnetism and an elementary treatment of Conduction of Electricity through Gases; and Radio-activity.

Thurs. 10-11. Mr. Robertson.

IV. LABORATORY.—This is a course of four hours per week on experimental work treating of matters which are fundamental to the lecture courses. The laboratory courses of the Junior and Senior classes are prerequisite to this course.

FINALS.

Students intending to attend the Final Honour lectures are advised to acquire a reading knowledge of French and German. The work consists of advanced courses of lectures on different branches of Physics and a course of experiments in the laboratory. Some of the lecture courses are given each year while others are given in alternate years. This class is required in the second option in M.A. Course B. Subjects I, III and IV are required in Specialist Course VII; 1 and 2 for the Master's Degree in Specialist Course VI; 2 and 5 for the Master's Degree in Specialist Course VII, and 2 and 3 in option 1 on M.A. Course B.

Candidates for Honours in Physics must make a minimum of 40 per cent. in each subject and an average of 60 per cent. in the mathematical courses 1, 2, 3, 4, 5, 6, 7, 8, 10 and 12 as specified on page 68.

Candidates for Honours in Physics must make a minimum of 60 per cent. in each of the subjects of the Final Honour class and standing will be determined by the average of the results attained in all of the examinations of the class.

Candidates may write upon all of the examinations of the Final Honour class in the second year of their Final Honour work or they may write as follows:—

Subjects 2 and 6 in first year and 3, 4 and 5 in second year, or

“ 2, 4 and 5 in first year and 3 and 6 in second year.

The courses of lectures are as follows:—

(1) DYNAMICS OF A PARTICLE AND OF SYSTEMS OF PARTICLES.—The work of this course involves the solution and discussion of the differential equations of various particular motions of a particle, much time being spent on the treatment of the linear equations of the second order as applied to free and forced damped oscillations; the solution and discussion of a few partial differential equations and the development and application of such important principles as the Principle of Virtual Work, the Principle of d'Alembert, Hamilton's Principle of Least Action and Lagrange's Equations.

Reference books:—

Webster, *Dynamics of a Particle, and of Systems of Particles.*

Ziwet, *Theoretical Mechanics.*

Thurs. 9-10. Professor Clark.

(2) DYNAMICS OF RIGID, ELASTIC AND FLUID BODIES.—In this course are discussed such topics as the Equations of Motions of a Rigid Body, Ellipsoids of Inertia, Motion with Fixed Axis, Motion with Fixed Point, Euler's Equations, Motion of the Symmetrical Top, Moving Axes, Foucault's Pendulum and Gyroscope, Stress and Strain Relations in Elastic Bodies, Elastic Constants and Hydrokinetics.

Fri. 9-10. Professor Clark.

(3) KINETIC THEORY OF GASES AND THERMODYNAMICS.—This course consists of lectures on the Dynamical Theory of Gases and of selected topics in Thermodynamics. In the first part of the course are discussed the rise, progress and the limitations of the Kinetic Theory of Matter. In the second part of the course, which is a continuation of the Preliminary Honour work in Heat, applications of the two laws of Thermodynamics are made to many problems dealing with gases, saturated vapours, solutions and galvanic cells.

Reference books:—Clausius *Die Wärmetheorie.*

Buckingham, *Thermodynamics.*

Boltzmann, *Vorlesungen über Gastheorie.*

Jaeger, *Die Fortschritte der Kinetischen Theorie.*

Professor Clark.

(4) PHYSICAL OPTICS.—This course of one lecture weekly throughout the year presupposes the knowledge of the fundamental principles of optics. While sufficient time is devoted to geometrical optics to give the student a clear insight into the method of attacking problems from the view-point of

ray propagation, stress is laid mainly on the theory and phenomena of Physical Optics. Special attention is given to the mathematical and physical discussion of, The Nature of Light, The Rectilinear Propagation of Light, Reflection, Refraction, Dispersion, Interference, Diffraction and Polarization. A brief discussion is given of the Electro-magnetic Theory of Light including a discussion of Maxwell's equations, some of the newer theories of electro-optics and the principle of relativity are treated as far as time will allow.

Reference book:—Wood, *Physical Optics*.

Professor Kalmus.

(5) ELECTRICITY AND MAGNETISM.—This course comprises lectures on:

(a) The Outlines of Electromagnetic Theory:—Fundamental theorems and relations, Waves, Energy-flow, Momentum, Variation of mass and linear dimensions with velocity, Ether-drift, and Accelerational pulses.

(b) The Electronic Theory of the Conduction of Electricity through Gases, and

(c) Radio-activity.

Reference books:—

Abraham-Föppl, *Theorie der Elektricgität*.

Jeans, *Mathematical Theory of Electricity and Magnetism*.

Thomson, J. J., *Conduction of Electricity Through Gases*.

Rutherford, *Radio-activity*.

Radio-active Transformations.

Mon., Thurs., 3-4. Professor W. C. Baker.

Lectures are given upon subjects 3 and 4 and upon 5 in alternate years. Subjects 3 and 4 will be taken up in session 1912-13.

(6) LABORATORY.—Students are required to spend at least twenty hours a week at experimental work in the laboratory where measurements are made under the direction of the different members of the staff. The aim is to familiarize the student with the conditions, the methods and the spirit of physical investigation. In the first year this is done through a selected course of experiments in Heat, Light, Sound, Electricity and Magnetism. In the second year, if the student shows himself capable, he is given a problem for independent investigation.

EXPERIMENTAL HONOUR PHYSICS.

This course is planned to meet the needs of students who require a more extended knowledge of Physics than that obtained in the Senior class but whose mathematical training is not sufficient to enable them to take the regular Honour course. It is called "Experimental Honour," partly to distinguish it from the regular honour course, and partly to indicate the general nature of the work. It aims to present certain aspects of the subject, usually

treated by the calculus, in manner suitable for students with but limited mathematical training. The class is divided into Preliminary and Final Honour Experimental Physics, each of which parts requires one year.

PRELIMINARY.

MECHANICS, PROPERTIES OF MATTER AND HEAT.—This class consists of two lectures a week throughout the year, accompanied by a laboratory course of eight hours a week. In the lecture course, the fundamental concepts of Physics are emphasized by detailed discussion of such topics as:—Simple Harmonic Motion, Dynamics of Rotation, Gravitation, Elasticity, Surface Tension and Capillarity, Flow of Fluids, Kinetic Theory of Gases, Laws of Thermodynamics, etc.

The scope of the course is much the same as that covered in the series of texts by E. Edser but use is also made of many other texts.

Reference texts:—

Worthington, *Dynamics of Rotation*.

Poynting and Thomson, *Properties of Matter*.

Edser, *A Text Book of Physics*.

Searle, *Elasticity*.

Poynting and Thomson, *Heat*.

Edser, *Heat*.

Watson, *General Physics*.

Duff, *General Physics*.

Mr. Robertson.

The laboratory course is planned to cover the measurement of standard quantities in Light, Sound, Electricity and Magnetism with additional experiments in Mechanics, Elasticity and Heat.

Mr. Robertson.

FINAL.

ELECTRICITY, MAGNETISM, LIGHT, CONDUCTION THROUGH GASES AND RADIO-ACTIVITY.—In this course two lectures a week are given, with a laboratory course of at least ten hours per week. The general aim of the lectures is to acquaint the student with the view-point of modern experimental physics. Some of the more recent developments of the subject are discussed. The student is also required to read articles in the current Physical Journals and in this way is encouraged to familiarize himself with these publications. The course includes a discussion of:—

1. Wave Motion, in which phenomena such as resonance, interference, diffraction, Doppler effect, are treated in a general way.

2. Selected topics in Physical Optics including interferometers, theory of diffraction, the echelon diffraction grating, characteristics of spectral lines, series of spectral lines, Zeeman effect, Fluorescence and Phosphorescence with special reference to vapours, radiation pressure, etc.

3. Discharge of condenser and electro-magnetic waves.
4. Conduction of Electricity through gases and Radio-activity.

The laboratory course consists of a series of selected experiments relating to and further illustrating the topics discussed in the lectures.

Mr. Robertson.

LIBRARY.

The principal Physical Journals and books relating to the lectures and the laboratory work are kept in the library of the Physics Department, where they may be freely consulted by the students. Certain of these may be borrowed for limited periods by making application to the librarian in charge.

EXTRA-MURAL STUDENTS.

See general regulations, page 55.

Extra-mural students are accepted in this department only in the Junior and Senior classes. The work is under the direction of the professors who give the intra-mural lectures, and is made to correspond as far as is possible to that done by the intra-mural students. A syllabus of the work will be sent to the student on registration. This includes notes on the method of work, lists of texts and a prescription of exercises. Extra-mural students are expected to send these to the University at dates not later than those prescribed. They should also write to the tutor stating what facilities, if any, they have for making experiments. If these are adequate, experiments will be prescribed and directions will be sent. The reports of this work will be then sent in with the other exercises. If the facilities for laboratory work are deemed inadequate, the experimental part of the class must be postponed until it can be done intra-murally. In any case the experimental work must be done satisfactorily before credit for the class can be given.

Under special circumstances, a limited amount of apparatus may be sent from the Laboratory upon conditions to be arranged.

BOTANY.

PROFESSOR—W. T. MacClement, M.A., D.Sc.

LECTURER—A. B. Klugh, M.A.

TUTOR—G. A. Miller.

PASS CLASS—ARTS AND MEDICINE.

An outline of the structure, activities, and life relations of plants.

FIRST TERM.—The dissection and drawing of seeds, roots, stems, buds leaves, flowers and fruits of seed plants. Lectures and experiments in plant physiology.

SECOND TERM.—A study of the seedless plants by dissections, drawings and experiments. The principles of classification, illustrated by Canadian plants.

Four field days in autumn, to study plant relations.

Forest conservation outlined by lectures.

Text-book—Bergen and Davis, *Principles of Botany*.

Reference Books—Coulter, *Plant Relations*.

Roth, *A First Book of Forestry*.

Fernow, *The Care of Trees*.

Stevens & Hall, *Diseases of Economic Plants*.

Class daily, 10-11. Professor MacClement.

HONOURS.

A course designed for students specializing in Biology and Paleontology.

PRELIMINARY.

A laboratory study of the development, structure and life processes of plants, with lectures, discussions and essays.

MORPHOLOGY.—A microscopic study of materials illustrating the modifications of plants from the simplest to the most complex. Permanent records in the form of drawings.

ANATOMY.—Thirty drawings of sections illustrating the minute structure of the normal organs of the higher plants with a class study of their development and function.

PHYSIOLOGY.—An experimental study of plant activities.

TAXONOMY.—The classification of Canadian flowering plants, ferns, and fern allies.

Each student is required to bring 100 pressed flowering plants or ferns for laboratory use.

Text-books:—Coulter, Barnes & Cowles, *Textbook of Botany*, Vol. I.

Bergen & Davis, *Principles of Botany*.

Lectures, Mon., Wed., Fri., 11-12.

Laboratory, Mon., Wed., Fri., 1-4.

Professor MacClement.

FINAL.

A course in plant histology, ecology, taxonomy and paleobotany. Field work, microtechnique, discussions, drawings and essays.

HISTOLOGY.—The practical preparation of permanent mounts of the different classes of plant structures both normal and modified, including killing, fixing, embedding, sectioning and staining.

Microchemical tests for the chief constituents of plants.

During first term, Tues. and Thurs., 2-5. Mr. Klugh.

ECOLOGY.—The relation of plants to environmental factors. Map-making from field trips, the study of specimens, of sections, and of texts.

TAXONOMY.—Mosses, Lichens and Fleshy Fungi.

Each student is required to bring for laboratory use 50 specimens of mosses, lichens, or fungi.

PALEOBOTANY.—Necessary to a study of organic evolution and with Morphology, Anatomy and Taxonomy for paleontology.

Text-books:—Coulter, Barnes & Cowles, *Textbook of Botany, Vol. II.*

Gray, *New Manual of Botany*.

Stopes, *Ancient Plants*.

Klugh, *Botanical Microtechnique*.

Lectures, Tues., Thurs., 11-12; Fri., 2-3.

Laboratory, during first term, Wed. 1-4; during second term, Tues.,

Wed., Thurs., 1-4. Professor MacClement.

EXTRA-MURAL STUDENTS.

The work is, as far as possible, the same as that done by intra-mural students. Materials for practical study are either furnished by the University, or may be collected by the student. The results of the study of this material are to be regularly and promptly forwarded to the University in the form of exercises, reports, notes, or drawings. The instructor in charge will examine these reports, and make necessary recommendations. At least 80 per cent. of exercises and drawings, and all the essays, must be in the hands of the instructor by the time the student makes application for examination. A good hand lens and simple dissecting instruments are required.

Experience has shown that the work in Preliminary Honours can be satisfactorily done by extra-mural students who will spend one or two summer sessions at the University in the laboratory work. Otherwise it can be completed only under especially favorable circumstances. Final Honours are not offered extra-murally.

ANIMAL BIOLOGY.

PROFESSOR—A. P. Knight, M.A., M.D.

LECTURER—A. B. Klugh, M.A.

LECTURER—G. E. Kidd, B.A., M.D., C.M.

DEMONSTRATOR—Thomas Little.

Students in Medicine are required to take the class in elementary morphology.

Students in Arts who intend subsequently to study medicine are advised to take the pass and honour classes and thus complete their physiology and histology during their undergraduate course. Besides the special course for B.A., M.B., the honour course in Science, C, number 2 (with Animal Biology) or the specialists' course in Science, is suitable for this purpose. The course in sanitary science for the degree of B.Sc. in practical science, is also suitable for medical students.

ELEMENTARY MORPHOLOGY.

Lectures or demonstrations will be given tri-weekly at 9 a.m. during the session. Part I will last from October until Christmas and will treat of general biology and the everyday lives of animals. Part II will deal with the outlines of classification and will cover the rest of the session. It will be suitable for students taking the honour course in Geology or the course in Mining Engineering. Arts students must take parts I and II. Science students need take part II only.

The lectures treat of manifestations of life, protoplasm, cells, cell division, reproduction, early stages of development, tissues, organs, differences between animals and plants, general view of the invertebrata and of vertebrata, organic evolution, every-day lives of animals.

The laboratory work consists of such dissections and demonstrations as will elucidate the subject of the lectures. The lectures are illustrated by diagrams, charts, and lantern transparencies.

Text-books:—J. S. Kingsley, *Comparative Zoology* (Henry Holt & Co.).
Jordan and Kellogg, *Animal Life* (American Book Co.).

EXTRA-MURAL STUDENTS.

Extra-mural students are required to do the practical work outlined for Honour Matriculation in Zoology. They will be examined on Colton's *Practical and Descriptive Zoology*.

HONOURS.

Candidates who intend to qualify as science specialists must take the Pass Class in elementary morphology.

The course in comparative and practical anatomy extends over two years.

Preliminary honours are awarded on the honour papers of the first session in honours.

Final honours are awarded on the honour papers of both sessions taken together.

The lectures and demonstrations in physiology and histology are attended simultaneously by students in Medicine and by honour students in Arts.

Honour students may attend the course of lectures on the "Development and Structure of the Nervous System" which is given by Dr. Kidd to medical students in the department of human anatomy.

Senior Physiology, *Tues. and Thurs.* 9-10; *Mon., Wed., Fri.*, 10-11.
Professor Knight.

Wed., Fri., 10-12. Mr. Klugh.

Junior Physiology, *Tues. and Thurs.* 10-11, *Fri.* 11-12. Professor Knight.

The senior course includes experiments upon muscle, nerve, the heart, blood-flow, respiration, etc., etc. The making of permanent records of these experiments by each student is an essential part of the class work.

SYSTEMATIC ZOOLOGY FOR THE B.A., M.D. COURSE.

The work of this class consists of the study of animal forms which are of importance to the medical student. This class meets in the Museum one hour a week throughout the session.

PRELIMINARY HONOUR CANADIAN ZOOLOGY.

The work in this class embraces the recognition of common Canadian forms of animal life as studied from museum specimens. Notes are given upon the habits and economic importance of the leading forms.

Lectures—Mon., Wed., 2-3.

Museum work, one hour per week at the student's convenience.

FINAL HONOUR CANADIAN ZOOLOGY.

The work in this class is a continuation of that of the Preliminary class, and entails the study of more forms, particularly of invertebrates. It also embraces instruction in preserving different animals.

Lecture—Tues., 3-4. Mr. Klugh.

Museum work, one hour per week at the student's convenience.

Graduation in honours in the department of biology lessens, by one year, the length of the course required by the Medical Council of Ontario.

The practical examinations in honours in this department are held at the University only.

PRACTICAL ANATOMY.

Dissection of vertebrate and invertebrate animals.

Mon., Tues., Wed., Thurs., 12-1. Professor Kidd.

HISTOLOGY AND EMBRYOLOGY.

Junior class—Mon., Fri., 10-11.

Senior class—Wed. 8-9, Sat. 11-12. Mr. Little.

The 75 histological specimens required for microscope study for preliminary and final honours may be bought from Mr. Little, Laboratory Assistant, for \$6.00.

Schafer, *Textbook of Physiology*, 2 Vols.

Halliburton, *Handbook of Physiology* (latest edition).

Hartwig, *Zoology*, translated by Kingsley.

Wiedersheim, *Elements of Comparative Anatomy*.

Hill, *Histology*.

EXTRA-MURAL STUDENTS.

Extra-mural students can procure the necessary marine forms for dissection by ordering them from "The Supply Department, Marine Biological Station, Woodshole, Mass., U.S."

CHEMISTRY.

PROFESSOR—William L. Goodwin, D.Sc., Edin., B.Sc. (Lond.),
F.R.S.C.

ASSOCIATE PROFESSOR—W. O. Walker, M.A.

ASSISTANT PROFESSOR—John Waddell, B.A., D.Sc., (Edin.); Ph.D.,
(Heid.); B.Sc., (Lond.).

ASSISTANT PROFESSOR—Leo F. Guttmann, A.C.G.I., Ph.D., F.I.C.

ASSISTANT PROFESSOR—W. D. Bonner, M.A., Ph.D. (Tor.).

LECTURER—R. J. Manning, M.A.

FELLOW—E. S. Bishop, M.A., B.Sc.

JUNIOR CLASS.

An introductory course in general chemistry with experimental demonstrations.

Text-books:—Alex. Smith, *General Chemistry for Colleges* (The Century Co., New York).

Laboratory Manual of General Chemistry.

Lectures—Mon., Tues., 11-12.

Laboratory—Mon., 2-5. Dr. Bonner.

SENIOR CLASS.

1. Organic Chemistry—The subject is treated in a general way in the lectures, and students are required to become familiar with laboratory methods in organic chemistry, and to make a few typical compounds.

Lecture—Thurs., 11-12.

Laboratory—Wed., 10-12. Professor Walker.

2. General and Analytical Chemistry—A course of lectures dealing mainly with the chemistry of the metals and the theory of qualitative analysis.

Text-books:—A. W. Titherley, *Laboratory Course in Organic Chemistry*
(Geo. Philip & Son, 32 Fleet St., London, Eng.).

Walker and Mohan, *Laboratory Manual of Qualitative Analysis.*

Lecture—Thurs., 8-9. Dr. Bonner.

3. Qualitative Analysis.

Laboratory—Wed., 2-5. Mr. Manning and assistants.

HONOURS.

PRELIMINARY.

1. Organic Chemistry.—The subject is treated in the lectures more in detail, and the typical reactions of the different classes of organic compounds are studied in the laboratory.

Lecture—Thurs., 9-10.

Laboratory—Wed., 2-5. Professor Walker.

2. Industrial Chemistry (or *Physiological Chemistry, Urinalysis, etc. See Medical Calendar):

*This option is for students who intend to take a course in Medicine.

The course deals with the manufacture of chemicals and other industrial products, and the apparatus employed, special attention being given to problems of importance to Canada at the present time.

Lectures—Mon., Thurs., 3-4.

Laboratory—Sat., 9-12. Dr. Guttman.

3. Qualitative Analysis.

Five hours per week—Mon. 8-12, Tues. 3-5, Wed. 8-10.

Mr. Manning and assistants.

4. Quantitative Analysis. *Three hours per week.*

Barium Chloride, Magnesium Sulphate, Acidimetry and Alkalimetry, Iron Ore, Brass, Limestone.

Dr. Waddell.

5. Introductory Physical Chemistry.

Lecture—Thurs. 8-9. Dr. Guttman.

6. Crystallography (Elementary). See Mineralogy (First Term).

Text-books:—W. A. Noyes, *Textbook of Organic Chemistry* (Henry Holt & Co.).

A. W. Titherley, *Laboratory Course in Organic Chemistry.*

Thorpe, *Industrial Chemistry* (The Macmillan Co., New York).

Williams, *Crystallography* (Henry Holt & Co.).

Walker, *Physical Chemistry*, (Macmillan & Co., London).

Talbot, *Quantitative Analysis* (The Macmillan Co., New York).

FINAL.

7. Physical Chemistry.—The various fields of physical chemistry, including a brief outline of electro-chemistry, are taken up, attention being given to the application of the principles involved. The most important physical chemical measurements are studied in the laboratory.

Lecture—Fri. 8-9.

Laboratory—Tues. 2-5. Dr. Guttman.

8. History of Chemistry.

Wed. 9-10. Dr. Goodwin.

9. Quantitative Analysis.

Mon. 8-12; Fri. 9-12. Dr. Waddell.

10. Advanced Organic Chemistry.—The lectures deal with selected topics of an advanced character. The laboratory work includes quantitative work and preparations of a more difficult character.

Mon. 2-5. Professor Walker.

11. Advanced Inorganic Chemistry.—A course of lectures with laboratory work on advanced inorganic chemistry.

Lecture—Wed. 10-11.

Laboratory—Mon. 1-3. Dr. Waddell.

12. Fire Assaying. This is given in the department of Mining and Metallurgy.
Sat. 8-11 (b).

Text-books:—Walker, *Physical Chemistry* (Macmillan & Co.).

Findlay, *Practical Physical Chemistry* (Longmans, Green & Co.).

Furman, *Manual of Assaying* (J. Wiley & Sons).

Syllabus of Quantitative Analysis.

Coal, Pig Iron or Steel, Lead Ore, Zinc Ore, Nickel Ore, Barite, Chromite, Feldspar, Titaniferous Ore.

Syllabus of Fire Assaying.

Gold and Silver.

NOTE.—An option is allowed between advanced Organic Chemistry and advanced Inorganic Chemistry.

EXTRA-MURAL STUDENTS.

Extra-mural students are required to do promptly the work set by the Tutor and will not be admitted to examination until this work is completed.

JUNIOR.

Books to be read:

Alex. Smith, *General Chemistry for Colleges* (The Century Co., New York).

Waddell, *Arithmetic of Chemistry* (The Macmillan Co., New York), Chapters I-V.

SENIOR.

Books to be read:

Walker, *Physical Chemistry* (Macmillan & Co., London).

Waddell, *Arithmetic of Chemistry*, Chap. VI to end.

Perkin & Kipping, *Organic Chemistry*, Part I and Part II, Edition 1908 (J. B. Lippincott & Co., Philadelphia).

MINERALOGY.

PROFESSOR—William Nicol, M.A.

FELLOW—N. B. Davis, B.Sc.

All classes meet in Ontario Hall, third floor.

Students in Mineralogy are expected to take part in the field excursions held during the Fall Term. Excursions are taken every Saturday, till the end of November, weather permitting, and on Saturdays when excursions cannot be taken, demonstrations in the museum will be given. The cost of the field work will not exceed five dollars.

Students intending to take Mineralogy are advised to take Junior Chemistry, Junior Physics and Junior German before commencing it.

Each student in this department is supplied with a locked cabinet containing about 150 mineral specimens for which a cash deposit of ten dollars must be made and a receipt given, and an agreement made to return the minerals at the close of the session.

One of the rooms in connection with the Department of Mineralogy has been furnished as a study and consulting room for students in this department. The Professor or his assistant will be available for consultation at hours when classes are not being held. Systematic and illustrative collections of minerals, crystals and models are on exhibition, and students are urged to take advantage of the facilities offered.

The Department is furnished with a first-class lantern and projection apparatus.

Books from the Library of the Department of Mineralogy and from the Professor's private library may be obtained by application to the Professor.

MINERALOGY I.

PASS.

1. Elementary Mineralogy. Demonstrations with specimens and the lantern.
2. Description and determination of the following minerals:

Diamond, graphite, native arsenic, native silver, native gold, native copper, stibnite, molybdenite, cinnabar, galenite, chalcocite, malachite, azurite, sphalerite, niccolite, smaltite, chloanthite, pyrrhotite, bornite, chalcopyrite, pyrite, marcasite, arsenopyrite, halite, fluorite, quartz and prisms, corundum, hæmatite, magnetite, chromite, pyrolusite, psilomelane, limonite, calcite, dolomite, siderite, orthoclase, plagioclase, pyroxene and vars, olivine, amphibole and vars, garnet, tourmaline, nepheline, sodalite, stilbite, analcite, natrolite, muscovite, biotite, phlogopite, chlorite, serpentine, talc, sphene, scapolite, beryl, epidote, zircon, staurolite, apatite, barite, celestite, gypsum, coal and vars.

Text-book: *Miller, *Minerals and How They Occur* (Copp. Clark Co.).
The class meets in the Mineralogy lecture-room, Ontario Hall.
Tues. 11-12.

3. Elementary Crystallography.

A course of about fifteen demonstrations with models and crystals given at the opening of the session.

Text-book: *Williams, *Crystallography* (Henry Holt & Co.).

4. Blowpipe Analysis—(a) A course of practical demonstrations to illustrate and explain the reactions in studying the chemical properties of minerals. (b) A practical class in which the experiments seen in the lectures are performed by the students.

Text-book: *Brush & Penfield, *Determinative Mineralogy and Blowpipe Analysis*, 1906, 15th Ed.

Books for Reference:

Cornwall, *Manual of Blowpipe Analysis* (Van Nostrand Co.).

Landauer, *Blowpipe Analysis*.

Endlich, *Manual of Qualitative Blowpipe Analysis*.

Moses & Parsons, *Mineralogy, Crystallography and Blowpipe Analysis*, 2nd Ed.

Students must supply their own blowpipe apparatus.

The class meets in the blowpipe lecture-room, Ontario Hall, text-book and small note-book, necessary.

Fri. 10-12.

HONOURS.

PRELIMINARY.

(A knowledge of French and German is desirable.)

1. SYSTEMATIC MINERALOGY, illustrated by specimens, charts, lantern-slides, etc,

Text-book: Dana's *Text-book of Mineralogy*, 1909 (Wiley & Sons).

} In Library of the
Department.

Practical work at hours convenient for members of the class.

2. PRACTICAL CRYSTALLOGRAPHY.

Practical study of crystal forms by means of crystals, and wire and wooden models. Two demonstrations per week are given at hours to suit the members of the class.

3. QUALITATIVE ANALYSIS of minerals by blowpipe and wet re-agents:—The course in Qualitative Analysis in connection with Preliminary Honour Chemistry and, in addition, the analysis of selected mineral samples to be secured by the students individually from the Professor. Written Reports of these must be handed in systematically.

Lectures on Qualitative Analysis.

Text-book: Fresenius, *Qualitative Analysis*.

Books for Reference:

Ostwald, *Foundations of Analytical Chemistry* (Macmillan & Co.).

Menschutkin, *Analytical Chemistry* (Macmillan & Co.).

4. Essays on prescribed subjects.

5. Lecturettes by the individual members to the class.

FINAL.

1. DESCRIPTIVE MINERALOGY.

Description and classification of the commonly occurring minerals, special attention being given to Canadian ores and rock-forming minerals. Study hours may be arranged to suit members of class. Attendance compulsory. Tuesday, 8 a.m. and Wednesday, 9 a.m.

Text-book: Dana, *System of Mineralogy*, 6th Ed. (Wiley & Sons).

Lectures on Quantitative Analysis.

4. Economic Geology. (See under *Geology*.)

5. Petrography. (See under *Geology*.)
6. The use of heavy solutions in separating minerals for rock analysis.
7. Use of Contact and Reflecting Goniometer.
8. Drawing Crystals from Goniometric Measurements.
9. Courses of lectures on Economic Mineralogy and History of Mineralogy.
These lectures will be illustrated by lantern-slides, and will be delivered at hours convenient for the members of the class.
10. A series of demonstrations with compound microscope to show the beauties and interesting phenomena of microscopic mineral mounts in reflected light.
11. Essays to be handed in as follows:
Oct. 14, 1912—Dana's Principles of Classification.
Oct. 30, 1912—The Diamond.
Nov. 15, 1912—Three Modern Mineralogists.

Books for Reading:

Hugh Miller's Works.
Lyell *Principles of Geology*.

The Professor reserves the right to retain essays of merit for use in the library of the department.

EXTRA-MURAL STUDENTS.

Examinations are held only at the University.

In addition to essays and correspondence, extra-mural students are required to determine and describe the minerals in collections furnished by the lecturer and unless students have access to a high school or collegiate institute laboratory it is useless to attempt this work.

For extra-mural students a collection of wooden crystal models may be obtained for one month by depositing five dollars with the Registrar, to be refunded when the models are returned. Application must be made early in the session for this collection so that it may be sent in turn to students.

Students Pay Express Charges.

A collection of rocks, minerals and fossils for illustrating Miller's "Minerals and How They Occur" will be sent by express to each extra-mural student as soon as the deposit of ten dollars has been made with the Registrar. This collection must be returned at the close of the session, when the deposit will be returned, less breakage and loss, if any. Express charges must be paid by students.

Text-books indicated by a star in the foregoing lists and a set of blow-pipe apparatus *must* be secured by the students.

The lecturer in Mineralogy will send directions and material for blow-pipe work as soon as students have registered. Reports of progress must be made periodically to the lecturer. The examination held in April at the University *only*, is largely practical, and for this examination students must bring with them the apparatus used by them at home during the session.

GEOLOGY.

PROFESSOR—M. B. Baker, B.A., B.Sc., F.G.S.A.

ASSISTANT PROFESSOR—Jesse E. Hyde, M.A.

The various courses in Geology, described in some detail below, are intended to equip both the professional Geologist, and the student who does not expect to use the knowledge professionally, but who will find the study a valuable one from the purely educational standpoint, and an interesting one throughout life.

Queen's University is exceptionally well situated for the study of Geology, indeed it has been stated by an eminent Canadian Geologist that with the possible exception of Freiberg it has no equal in this respect. Within a half hour's walk of the College Laurentian rocks, the back bone of Canada are exposed and on their eroded and disintegrated borders the first geological records of the earth's history are to be read. Students are thus immediately in contact with Nature's Museum where the geological processes are written with unmistakable clearness, and every opportunity is taken to give them the benefit of practical acquaintance with the unusually rich materials of the neighborhood. See under Field Work, page 140.

PASS GEOLOGY.

NOTE.—Students taking Geology, who have not taken, or are not taking Pass Mineralogy, are required to attend a brief course of lectures on minerals (Mineralogy V) delivered specially for Geology students at the beginning of the fall term.

In this class an introductory course in General Geology is taken up, including an elementary treatment of stratigraphical Geology and Paleontology. It is therefore a preparatory course for those students who proceed to more advanced work in Geology, and is at the same time a complete, though elementary, course for those who do not pursue the subject any farther.

The following subjects will be treated of in the lectures:—The Planetary relations of the Earth; the atmosphere; the hydrosphere; the lithosphere; the probable nature of the Earth's interior; the general characters and classifications of rocks; volcanic action; earthquakes; upheaval and subsidence; the geological effects produced by heat; air, water and life; bosses; dykes; veins; stratification, dip and strike; anticline and syncline; faults; foliation; the nature and uses of fossils; stratigraphical Geology; an outline of the history of the Earth including the evolution of its plant and animal life.

The lectures are illustrated by maps, diagrams, and lantern slides.

Laboratory work will consist of the examination of typical specimens of the different groups of fossil plants and animals, and of hand specimens of the more common rocks.

During the months of October and November excursions will be conducted each Saturday to places of Geological interest in the vicinity of Kingston. Students in Geology and Mineralogy are required to take part in these excursions. The cost will not exceed \$5.00. Each student should provide himself with a suitable hammer, specimen bag, and notebook.

Tues. 9-10; Thurs. 2-3.

First term, Professor Baker; second term, Professor Hyde.

EXTRA-MURAL.

A corresponding tutor is engaged to communicate with extra-mural students taking Pass Geology.

The work in Honour Geology being largely of a practical nature, must be taken intra-murally.

Extra-mural students are advised to read, in addition to the text-book Le Conte's *Elements of Geology* (5th edition); Norton's *Elements of Geology* (Ginn & Co.), and Miller's *Minerals and How They Occur* (Copp Clark). They will also be required to write essays on prescribed subjects. Students who are not taking the Mineralogy are advised to pay particular attention to Chapter A of Scott's Geology, and to provide themselves with a collection of the principal rock-forming minerals.

PRELIMINARY HONOUR GEOLOGY.

GENERAL GEOLOGY.

FIRST TERM: The origin of the Earth and the principles of earth movements, deformation, faulting, mountain formation, metamorphism, and vulcanism are covered in a more general and more advanced way than in Pass Geology.

SECOND TERM: Advanced consideration of surface processes, action of winds, streams, waves, glaciers, etc., various types of marine and continental sedimentation, and the development of land forms.

First term, Wed. 10-11; second term, Mon. and Fri. 10-11.

Professor Hyde.

ELEMENTARY PETROGRAPHY.

This course is essentially on igneous geology and petrography, and will consist of lectures on the use of petrographical microscope and accessories in the determination of rock-forming minerals, and in the determination of some of the more common igneous rocks by both microscopic and field tests. This will be followed by lectures and discussion on the geological occurrences of igneous rocks, the processes of crystallization from magmas, the forms assumed, the textures, and the metamorphic changes that are produced in the intrusive mass itself, and on its surroundings. The lectures will be illustrated by projections of thin sections of rocks, and will be supplemented by laboratory work on hand specimens and rock slices.

Tues., Thurs., 10-11. Professor Baker.

Laboratory class two hours per week to be arranged to suit students' time-table. Professor Hyde.

ECONOMIC GEOLOGY.

A course of lectures will be given on the genesis of ore deposits, their modes of occurrence, classification, and secondary enrichment. The subject of 'croppings' or gossan formation will be discussed, also the faulting and other disturbances of ore deposits, the tracing of the faulted portions, the surface and underground evidences of faulting, etc. During the term excursions will be made to various mines in the vicinity of Kingston.

First term—Mon., Fri., 10-11. Professor Baker.

GEOLOGY OF CANADA.

In this course special attention will be given to stratigraphical Geology, and the distribution of the various rock formations in Canada. The topography as well as the structural make-up of the Dominion is studied. The climatic and economic differences of the various portions of Canada are explained.

Wed. 10-11, second term. Professor Baker.

FINAL HONOUR GEOLOGY.

HISTORICAL GEOLOGY.

After a brief study of the various types of sedimentary formations and the principles of Paleogeography the history of the North American continent is taken up. A number of the more important fossils of each period are studied and their recognition on sight required. Brief consideration is also given to the history of the Science of Geology.

Mon., Thurs., 11-12. Professor Hyde.

ADVANCED PETROGRAPHY.

A course of lectures will be given on the microscopic characters and classifications of igneous rocks, and on their origin, classification and general field characters. The lecture work will be supplemented by assigned special reading and by laboratory work with both hand specimens and microscopic slices. Special attention will also be paid to the metamorphic rocks.

Books for reference:—

Fri. 11-12. Professor Baker.

Laboratory class two hours per week to be arranged to suit students' time-table.

ECONOMIC GEOLOGY.

The work in this class is supplementary to that in Preliminary Honour Geology, and is an illustration of the principles of ore deposition studied in that class. For this purpose type deposits in the largest producing districts throughout the world are studied in some detail. It is of course impossible to treat of all products, but the basis of classification and the fundamental principles underlying economic deposits are studied with particular reference to iron, copper, nickel, zinc, lead, silver, gold, aluminium, peat, coal, gas, oil, salt, abrasive and refractory materials. A few lectures on building stone, and on clays and the manufacture of clay products will be given.

Within one hundred miles of Kingston there is a greater variety of economic minerals and ores mined than in any similar area in Canada, and possibly in the world. Through the kindness of the managers, these properties are visited by the advanced students and are of inestimable value to them in gaining information regarding economic geology.

Tues., Wed., 11-12. Professor Baker.

FIELD AND LABORATORY GEOLOGY.

The laboratory exercises in this course are designed to illustrate by means of specimens, models, photographs, maps and sections, the principal original and secondary structures of rocks; the origin and mode of occurrence of rocks in the Earth's crust, their cycles of alteration and change, their interpretation and representation in geological surveys and maps.

The field work comprises observations upon the weathering of rocks, shore phenomena, glacial phenomena, igneous and sedimentary rocks, faulting, folds, joints, cleavage, schistosity. Practice in methods of surveying, and geological mapping and construction of sections; measuring the thickness of strata and determining the relative ages of geological structures. The preparation of a map to scale from actual field work done by the student is required.

Four working hours per week will be arranged to suit the class at the beginning of the fall term.

Graduates or others wishing to investigate any special geological problem will have all possible facilities in the way of laboratories and apparatus placed at their disposal. A departmental library is maintained to which students will have free access.

ART. XI—POST-GRADUATE DEGREES.

DOCTOR OF DIVINITY (D.D.)

This degree is honorary, and is awarded for literary or professional distinction.

DOCTOR OF LAWS (LL.D.)

This degree is honorary, and is awarded for literary, scientific or professional distinction.

DEGREE OF DOCTOR OF PHILOSOPHY (Ph.D.)

AND DOCTOR OF SCIENCE (D.Sc.)

1. Candidates for these degrees must comply with one of the following conditions:

(a) If they offer themselves for the degree of Ph.D. or D.Sc. in any two of the Arts subjects, they must previously have taken the degree of M.A. in these subjects, or must satisfy the Senate of their ability to proceed with the course.

(b) If they offer themselves for the degree of Ph.D. in one of the Arts subjects and either Old Testament Language and Literature or New Testament Language and Literature they must have previously obtained the degree of M.A. or B.A. with first-class honours in the Arts subjects chosen, have completed their course in Theology, and have passed the examination in half of the course for B.D.

(c) If they offer themselves for the degree of Ph.D. in Old Testament Language and Literature and New Testament Language and Literature they must previously have taken an Arts degree and the degree of B.D.

2. The degree cannot be obtained in less than three years after the above conditions have been complied with. A year's resident work may be required at any stage of the course by the professors concerned in the work.

3. Work for the degree shall be carried on in two or more departments, the major, in connection with which the thesis shall be written, and one minor or two semi-minors in which the requirements of the examinations shall be of a less exacting character.

4. A candidate shall submit a thesis on some subject connected with the major courses, embodying the results of original investigation, a copy of which shall be submitted to the departments concerned not later than February 15th in the year of the final examinations. On approval of the thesis the candidate shall deposit with the Librarian fifty printed copies, or give a guarantee that these shall be deposited not later than one year after the degree has been conferred.

Publication of the thesis in any reputable journal, or in the transactions of any learned society, fifty off-prints of which shall be duly deposited with the Librarian, will be accepted as an equivalent.

5. Candidates for these degrees must make application through the Registrar to the Senate to be allowed to proceed with the course, stating the subjects they wish to offer, and must register either as intra or extra-mural students each session in which work is taken. For fees of intra-mural students see page 20, for extra-mural, 54. Extra-mural students in addition to the registration fee must pay a tutorial fee of \$5 per session for each subject.

6. The following conditions are laid down with regard to preliminary, interim and final examinations.

(a) There shall be at least one external examiner in each course, for the major subject and thesis.

(b) Preliminary qualifying examinations when required will be set by the Professor in charge.

(c) Interim and partial examinations, to be held before the third and last year, may be set and conducted by the Professor concerned in any course.

(d) Final examinations shall be conducted only during the ordinary sessional examinations and must be conducted within the University.

I.—DEGREE OF Ph.D.

LATIN.

The Ph.D. course in Latin is a continuation of the Honours work, but is more specialised and involves a more detailed use of original authorities. Latin may be taken as either a major or a minor subject. Papers will be set on the following:

- (1) Composition.
- (2) Translation at Sight.
- * (3) Roman History from 133 B.C. to 117 A.D.
- * (4) Latin Literature.

† (5) *One of the following:—*

(a) A special period or department of Latin literature studied in connection with original authorities.

(b) A special period or department of Roman history studied in connection with original authorities.

(c) Latin Palæography and Textual Criticism, with a special critical study of selected texts.

(d) Roman Archæology.

(e) The Italic Dialects and the History of the Latin Language.

All intending candidates should consult the Professor, who will be glad to give information and advice.

*Only for candidates taking Latin as a Minor Subjects.

†Only for candidates taking Latin as a Major Subject.

GREEK.

Candidates for Ph.D. may offer Greek as a minor or as a semi-minor subject.

A semi-minor course includes:

1. A detailed study of select texts, namely, those prescribed in the Final Honours course, with additions.
2. A general knowledge of the Political and Literary History of Greece.
3. Unseen Translation and Greek Prose Composition.

A minor course includes the foregoing in a somewhat elaborated form, with the addition of,

1. A survey of Archæology in Greek lands.
2. Comparative Philology. For this part of the work such a manual as that of Giles is sufficient.

ENGLISH.

In English only a semi-minor course is offered. It consists of the work in section I, together with the work in either section II or section III, and is open only to those who have made seventy-five per cent. or over in Final English Honours.

I.

1. A minute knowledge of Anglo-Saxon Grammar and Phonology.
2. A careful study of the *Béowulf*, with essays on three of the following topics:—

- (a) A study of Old English Heroic Poetry based on the *Béowulf*.
- (b) The Art of the *Béowulf*.
- (c) The Heathen and the Christian Elements in the *Béowulf*: their relation and significance.
- (d) The *Béowulf* as a Representation of the Life and Beliefs of the Time.
- (e) Myth and History in the *Béowulf*.
- (f) Style and Vocabulary as a Test of Authorship in Anglo-Saxon Poetry.

II.

A general study of Chaucer and the relations which his work bears (1) to Old English poetry, (2) to the poetry of Northern France, (3) to Italian poetry. Candidates will write papers on two of the following subjects:—

- 1. *The Complaynte unto Pite* as a typical specimen of French Court Poetry, with attention to the conventional element and to the possible personal element.
- 2. Chaucer's handling of the octosyllabic couplet in the *Book of the Duchess*; its technical and artistic qualities.
- 3. The influence of Dante in Chaucer's *House of Fame*.

III.

A special study of any two of the following works:—

- 1. Wordsworth's *Prelude*.
- 2. Carlyle's *Life of John Sterling*, or Carlyle's *Cromwell's Letters and Speeches*.
- 3. Tennyson's *In Memoriam*.

NOTE—Candidates are required to have a reading knowledge of French and German.

HISTORY.

The following sections of study are offered in History, four constituting a major, three a minor, and two a semi-minor. For a major section I is compulsory. The thesis may be chosen from any of the fields of study, but the presence of original material in the Canadian Archives and some of the greater American libraries makes the choice of American and Canadian themes preferable.

I. The Earlier Constitutional History of England. Stubbs in his three volumes may be taken to cover the ground here; but more recent results must be studied in Maitland's constitutional volumes, especially 'Domesday Book and Beyond'; J. H. Round's 'Feudal England'; Chadwick's 'Origin of the English Nation.' In addition to a general knowledge of the whole period, students will select detailed points for more special study:—*e.g.*, the constitutional documents of Henry II's reign; or "Magna Carta," with McKechnie's 'Magna Carta' as guide; or "The Development of Parliament under Edward I." Knowledge of Latin is essential here.

II. A short period of British History, to be selected in consultation with the Professor of History, and to be studied from contemporary authorities. No recommendations are made, but the following are given as illustrations:—*The Reign of Henry VIII*, worked up from (a) calendars of state papers; (b) the Statutes of the Realm; (c) various social, political or literary documents such as More's Utopia and his Life by Roper, Cavendish's Wolsey, Thomas Cromwell's Letters, Strype's writings on the reign.

The Great Rebellion, with Gardiner's volumes as guide, and the memoirs of the time, *e.g.*, Clarendon's, Baillie's, Ludlow's as material. Knowledge will be expected also of Milton's controversial writings; religious writings like George Fox's autobiography; the Letters of Oliver Cromwell; and the chief constitutional documents of the time.

III. A Period of European History, or a subject, equivalent to a period. If a period were taken—*e.g.*, 1558-1598—the activities of all the great powers would have to be studied, and such minor matters as were connected with the great powers. If a subject were chosen, it would be such as these—The Florence of Savonarola and Machiavelli; the Sixteenth Century Seamen; the Jesuits in Europe; the development of the Modern German Constitution.

A knowledge of a foreign language, French, German or Italian, is requisite here, and certain books will be set in the particular language chosen.

- IV. A period of Colonial History, preferably Canadian, or a subject equivalent to a period. Candidates must not only know the literature of the period or subject, but will be expected to do research work among unpublished documents.
- V. A period of American History, or a subject equivalent to a period. The period or subject may be either previous or subsequent to the American Revolution.
- VI. *British India*. Mill's History (in its latest form) may be regarded as covering the ground, in conjunction with Malleeson & Kaye's History of the Mutiny. Candidates must know the constitutional changes from the beginning onwards. The following lives must be studied:—Warren Hastings, Wellesley, Dalhousie, John Lawrence; recent developments should be known at first hand.

When candidates have been accepted by the Senate, they should write at once to the Professor of History stating what subjects they select; they will then receive from him definite instructions with regard to texts, etc.

MENTAL AND MORAL PHILOSOPHY.

I. Candidates who desire to obtain the degree of Ph.D. in Philosophy alone are allowed the following options which count as two majors:—

A. They may offer any *four* of the following books:—

Plato, *Republic*.

Aristotle, *Organon* (Selections of Oxford Press), *Metaphysics* (Selections), *De Anima*, *Nicomachean Ethics*, *Politics*.

Kant, *Kritik der reinen Vernunft*, *Kritik der praktischen Vernunft*, *Kritik der Urtheilskraft*.

Hegel, *Encyclopädie*, I and III; *Wissenschaft der Logik*, any two books; *Phänomenologie des Geistes*, *Philosophie des Rechts*, *Philosophie der Religion*.

Ability to translate the books offered is presumed.

B. They may offer any *two* of the above books, together with the works of any *one* of the following authors: Rousseau, Comte, Schopenhauer, Lotze, Hartmann, John Stuart Mill, Herbert Spencer, T. H. Green, Henry Sidgwick, Edward Caird or F. H. Bradley.

C. They may offer any *two* of the above books, together with *one* of the following sections:—

(1) The Principles of logic. References: The logical treatises of Hegel, Mill, Jevons, Venn, Lotze, Sigwart, Bradley, Bosanquet and Joseph.

(2) The Principles of Psychology. References: The psychological works of James Mill, J. S. Mill, Bain, Wundt, Sully, Ladd, James, Adamson, Lotze, Ward and Stout.

(3) The Principles of Ethics. References: The ethical works of J. S. Mill, Bain, Sidgwick, Green, Bradley, Spencer, Stephen, Martineau and Caird.

(4) The Principles of Aesthetics. References: The aesthetic treatises of Aristotle, Lessing, Kant, Schiller, Hegel, Lotze, Schasler, Ruskin, and Croce.

D. They may offer any one of the authors mentioned above in Section B, together with one of the sections under C.

II. Candidates who combine a partial course in Philosophy with the work prescribed in another department may offer either (1) any *two* of the books mentioned above in I, A, or (2) the works of any one of the authors mentioned in I, B, or (3) one of the sections in I.C. Any of these options counts as one major.

POLITICAL AND ECONOMIC SCIENCE.

Candidates offering Political and Economic Science as their major subject will be required to take work within five of the following groups of study; candidates choosing it as their minor, within three groups. Where possible, the Canadian aspect of the problems considered will be especially stressed. Details of the reading and requirements in the various courses may be obtained from Professor Skelton or Professor Swanson.

1. Economic Theory: Scope and Method, Value and Distribution.

2. Finance: Money, Banking, Insurance, Corporations and Corporation Finance.

3. Commerce and Transportation: Economic History and Geography, Trade, Tariffs, Railroads.

4. Public Finance and Taxation; Statistics.

5. Political Theory: English and American Theories since the 17th century.

6. Comparative Government, national and municipal, structure and working.

7. Jurisprudence, Constitutional Law, International Law and Diplomacy.

8. Anthropology and Social Origins.

9. Social Problems; the Labour Movement; Socialism.

OLD AND NEW TESTAMENT LANGUAGE AND LITERATURE.

1. Candidates must take note that the amount and quality of the work demanded for this degree will, in the judgment of the Faculty, require three years' post-graduate work at the University, or six years' extra-mural work.

2. Candidates are required to present a thesis on a subject chosen from their *Major* Course and approved by the Professors of the department.

OLD TESTAMENT LANGUAGE AND LITERATURE.

The candidate will be required to show to the Examiners, by means of critical essays and examination papers, that he possesses comprehensive and accurate knowledge in the following departments:

A.—MAJOR COURSE.

(1) Languages; Hebrew and Aramaic.

Unseen Translation.

Hebrew Composition.

(2) History; the history of Israel to the year 141 B.C. Outline of the history of Egypt and Babylon, in so far as these bear on the history of Israel.

(3) Literature; the contents and character of the books of the O. T. and of the following books:—Ecclesiasticus, Maccabees, I and II; Esdras, I and II; Baruch, Tobit, the additions to Daniel.

(4) O. T. Theology or history of the Hebrew religion down to 141 B.C.

(5) Criticism, textual, literary and historical. In this department papers will be set on books, or portions of books, representing all classes of Hebrew Literature, historical, poetic, prophetic, etc. The quantity of this work will be arranged with each candidate after consultation with the Professors involved in his course. A list of books and suggestions as to methods of work may be had on application to Prof. W. G. Jordan.

B.—MINOR COURSE.

1. History; the history of Israel to the year 141 B.C. Outline of the history of Egypt and Babylon, in so far as these bear on the history of Israel. (Two papers).

2. Literature; the contents and character of the books of the O. T. and of the following books:—Ecclesiasticus; Maccabees, I and II; Esdras, I and II; Baruch; Tobit; the additions to Daniel. (Two papers).

3. O. T. Theology or history of the Hebrew religion in the post-exilic period. (One paper).

4. Criticism, textual, literary and historical. In this department papers will be set on books, or portions of books, representing all classes of Hebrew Literature, historical, poetic, prophetic, etc. In quantity about fifteen chapters of Hebrew will be required. (Three papers). The assignment of this work will be arranged with each candidate after consultation with the Professor of the Old Testament department.

NEW TESTAMENT LANGUAGE AND LITERATURE.

*For Minor omit all marked**

1. The Language of the Greek N. T.

(1) A knowledge of the characteristic differences between classical Greek and the κοινή or Greek of the N.T.

Books to be consulted:

*Blass, *Grammar of the Greek N. T.*

Moulton, *Grammar of the Greek N. T.*, Vol. I.

Deissman, *Bible Studies*, English ed.

- *(2) Translations of selections from the Papyri of B.C. 200-150 A.D. required.

The Tebtunis, Oxyrhynchus, Amherst, Grenfell and Hunt *Greek Papyri* may be consulted in the Library.

Two papers for Major; one for Minor.

2. History: Jewish and General History from the time of Alexander the Great to the end of the 2nd century. One paper for Minor; three for Major.

3. Literature:—

**Book of Daniel.*

The Ethiopic Book of Enoch, ed. and transl. by Charles.

Apocalypse of Baruch, Charles.

The Wisdom of Solomon, The Apocryphal Acts and Apocryphal Gospel (edited by Pick).

Psalms of Solomon, edited by Ryle and James.

Critical History of Doctrine of Future Life in Israel, Judaism and Christianity, R. H. Charles.

*Schurer, *Jewish People in the time of Jesus Christ*; Div. II, Vol. III.

James Drummond, *Philo-Judaeus or the Alexandrian Philosophy*.

Three papers for Major, two for Minor.

4. Theology of the N.T. and History of the Apostolic Age.

Stevens, *N. T. Theology*.

*Pfleiderer, *Primitive Christianity*, Vols. I and III (Eng. Trans.).

*Weizsäcker, *The Apostolic Age*.

McGiffert, *The Apostolic Age*.

5. Criticism and Exegesis of the Gospel according to John,* Galatians, Ephesians, Philippians, Colossians, Hebrews.*

The Synoptic Problem* and the Johannine question.*

Two papers for Minor, four for Major.

Books:—

Burkitt, *Gospel History and its transmission*.

Stanton, *The Gospels as Historical Documents* (Vol. II).

Oxford Essays on the Synoptic Problem.

Moffatt, *Introduction to the N.T.*

Drummond, *Character and Authorship of the Fourth Gospel*.

Bacon, *Introduction to the New Testament*.

Expositor's Greek Testament Commentary on John, Gal., Eph., Hebr., Phil., Col.

Armitage Robinson Com. on Eph.

International Crit. Com. on Gal., Eph., Phil., Col.

History of N. T. Textual Criticism is expected. Kenyon's *Textual Criticism* is recommended.

DEGREE OF D.Sc.

COURSE FOR THE DEGREE OF D.Sc. IN CHEMISTRY, BIOLOGY
AND GEOLOGY.

Candidates are required to have a thorough knowledge, practical and theoretical, of the subjects in one of the following divisions:

1. CHEMISTRY—one of the following groups:

- A. Inorganic Chemistry.
- B. Organic Chemistry.
- C. Physical and General Chemistry.
- D. Industrial Chemistry.

2. BIOLOGY.

Comparative Anatomy and Physiology, Chemistry of Ferments, Bacteriology, with either of the following groups:

- I. (1) Research in Vegetable Morphology or Physiology or Ecology.
(2) A practical acquaintance with the Cryptogamic Flora of Canada.
- II. (1) Animal Physiology and Embryology.
(2) Osteology and Odontography of Vertebrates.
(3) Special Study of Invertebrates (Canadian).
(4) Physiological Chemistry.

A thesis containing original work done in one of these subjects.

3. GEOLOGY.

Standing equivalent to Preliminary Honours in Chemistry and Final Honours in Mineralogy will be required of candidates in this department.

Either of the following groups may be chosen by a candidate as his *chief subject*, and he will be required to take the other group as a *subordinate subject*:

- (1) Dynamical Geology and Petrography.
- (2) Stratigraphical Geology and Palæontology.

The candidate will be expected to show an acquaintance with his subordinate subject equivalent to Honours in the undergraduate course. An intimate knowledge of the chief subject must be shown.

Detailed information to be obtained from the Professors.

GENERAL ANNOUNCEMENT.

The course in Theology extends over three sessions of six months each, and embraces the following subjects of study: Apologetics, two sessions; Systematic Theology, Old and New Testament Criticism and Exegesis, Church History, Practical Theology, each three sessions, Public Speaking, two sessions. Junior Hebrew and Senior Hebrew, each one session, for those who have not included them in their Arts course.

2. The student who desires to enter upon the study of Theology must be a graduate of this University or of a University whose degrees are recognized by the Senate; or he must have completed three years of a university course, prescribed by the General Assembly as follows:—

First Year:—Latin, Greek, English, Mathematics, and Biology, or Chemistry, or Physics.

Second Year:—Latin, Greek, English, Logic, Philosophy, (Psychology), and Ancient History or Political Economy.

Third Year:—English (or a modern language), Mental and Moral Philosophy, History (Mediæval or Modern), Hebrew. It is strongly recommended that two years of Hebrew be taken in this course. In this scheme the order of subjects may be changed.

3. Students are expected to have passed the Junior Hebrew class, and are recommended to take a full course in Arts, and to obtain a degree, before entering upon the study of Theology.

An Arts course, as here recognized, must embrace the study of Greek.

4. Students on entering Theology, or on intimating their purpose to study for the ministry, must be in full communion with the Church; and all such students are required, during their course, to be in communion with a congregation of the Church in Kingston.

5. At the beginning of each session each student must present a certificate to the Secretary of the Faculty from the Presbytery within whose bounds he has resided during the summer vacation; and at the close of each session he shall, at the earliest opportunity, present his certificate to the Presbytery within whose bounds he purposes to reside.

6. The Church requires the following discourses to be delivered during the course:—(a) A homily, (b) A popular sermon, (c) A lecture, (d) A Greek and a Hebrew Critical Exercise.

7. Testamurs in Theology are given to students who have passed the sessional examinations on all the subjects prescribed by the General Assembly for students for the ministry.

8. Pass and B.D. examinations are held annually in April and October, and supplementary examinations only in October.

9. Benefactors have placed at the disposal of the Principal a few nominations, exempting from payment of class fees throughout the course in Arts, for intending students of Theology who have matriculated and who shall take their full course at Queen's. Application for these should be made to him or to the Registrar before Oct. 5th.

The Stewart bequest of \$5,000 to the Theological Department will be administered by the Faculty in terms of the will.

10. For further information see Blue Book of the Church, or apply to Rev. Dr. Ross, Dean of the Faculty.

MATRICULATION.

Matriculation examinations begin on Thursday, Oct. 10th. Candidates must give notice, with fee of \$2, to the Secretary of the Faculty before Oct. 6th, accompanied by a Presbyterial certificate.

Subjects of Examination:

Examination papers will be set in the following departments:

1. The Shorter Catechism and the contents of the Gospel of Matthew and the Epistle to the Romans, in English.
2. Acts of the Apostles, I-XII in Greek, Dods' Introduction, 76-151.
3. HEBREW—The Article, Pronouns, Inseparable Particles, the Qal of Regular Verb, Grammatical Analysis, Ps. I, I Sam. IX.
ENGLISH—Amos I, VII, Hos. I-II, Isaiah I, VI, VII, Micah I-III, Jordan's Prophetic Ideas and Ideals, pp. 108.
4. The Acts of the Apostles in the R. V., and Bartlett's Early Church History, pp. 1-66.
One paper will be set in each department.

PRIZES, SCHOLARSHIPS, ETC.

See Arts Calendar for other announcements.

Chemistry, Preliminary.—Class II, Adams, J. G.; Henry, V. R.; Millar, G. A.; VanBlaricom, E. W.; Brown, D. Class III, McQuay, G. B.; Lealand, L.; Shales, W. E.

Chemistry, Final.—Class I, Tuttle, J. R. Class II, McIntosh, H. Class III, Farrell, J. W. D.; Thompson, E. A.

Geology, Preliminary.—Div. II, Smith, G. J.

Mineralogy, Preliminary.—Class I, Smith, G. J.

PRACTICAL SCIENCE.

SUPPLEMENTAL EXAMINATIONS, SEPTEMBER, 1911.

Junior English.—Div. II, Wilkins, C. H. Div. III, Nell, E. P.

Mathematics I, Algebra.—Div. II, Millen, W. A.; Henrichs, A. G. Div. III, Hagey, C. R., White, W. F., equal; Braun, E. F.; Shearer, D. B.; Leckie, N. E.; Craig, H. C.; Harvey, J. P.

Mathematics I, Geometry.—Div. I, Bell, J. W. Div. III, Hagey, C. R.; Craig, H. C.; Harvey, J. P.

Mathematics I, Astronomy.—Div. I, Cross, J. G. Div. II, Craig, H. C. Div. III, Macpherson, K. P.; Pound, J. F.; Huff, F. H.; McCartney, N.; Braun, E. F.; Craig, A., Hagey, C. R., equal.

Mathematics I, Trigonometry.—Div. III, Smail, H. A.

Mathematics II.—Div. II, Matheson, H.; Henrichs, A. G. Div. III, Caughey, J. E.; Alyea, O.; Smail, H. A.; Cameron, W. G.; Hinton, R., Bews, D., Pound, J. F., Leckie, N. E., equal.

Mathematics III.—Div. I, Lewis, A. L. Div. II, McAuliff, F. P.; Cook, W. E. Div. III, VanSickle, C., Huff, F. H., equal; Alyea, O.; Dewar, D. F.; Byers, D. P.; Pound, J. F., Bews, D., Smail, H. A., equal.

Physics I (a).—Div. II, Smail, H. A. Div. III, Craig, J. A.; Mathews, H. E.

Physics I (b).—Div. III, Noonan, W. F.; Harris, H.

Physics II.—Div. II, Caughey, J. E. Div. III, Henrichs, A. G., Hinton, R., equal; Harvey, J. P.; Sirett, E. J.; Smail, H. A.; White, W. F., Fitzgerald, C. C., equal.

Physics III.—Div. III, Goodwin, G.

Physical Chemistry I.—Div. III, Cross, J. G.

Mineralogy III.—Div. III, Alyea, O.

Mineralogy IV.—Div. III, Marshall, J. R.; Kinnear, L. A.; Meikle, M.; McGregor, S. E.

Geology I.—Div. III, Smail, H. A.; Byers, D. P.

Metallurgy I.—Div. III, Asselstine, C. V.; Malloch, N.

Thermodynamics I.—Div. III, Dawson, S. G.

Electrical Engineering I.—Div. II, MacGregor, S. E. Div. III, Lamson, B. F.; Fitzgerald, C. C., White, W. F., equal; McKenzie, J. E.; Gray, A. W.

Electrical Engineering II.—Div. III, Gow, D. B.

General Engineering I.—Div. II, McGregor, S. E. Div. III, McNiece, L. G.; McAuliff, F. P.; Brickenden, F. M., Meikle, M., White, W. F., equal.

Hydraulic Engineering I.—Div. II, Gow, D. B. Div. III, McKenzie, J. E.

Mechanical Engineering VII.—Div. III, McKenzie, J. E.; Gibson, J. N.; Pound, J. F., Dewar, D. F., equal; Aird, J.

Descriptive Geometry.—Div. I, Matheson, H.; Chown, R. D. Div. II, Cram, R. M., Harvey, J. P., Gibson, J. N., McAuliff, F. P., equal. Div. III, Wilson, R. R.; Cook, W. E.

Surveying I.—Div. III, McPherson, K. P.

Surveying VI.—Div. II, Van Sickle, C.; Asselstine, R. M. Div. III, Marshall, J. R.

SPECIAL EXAMINATION, CALCULUS, DECEMBER, 1911.

Calculus Second Year.—Div. I, Bartlett, R. Div. III, McCullough, F. H.

ENDOWMENT OF CHAIRS AND TUTORSHIPS.

In 1888, William Nickle, Esq., Kingston, gave the sum of \$2,500 to found "The William Nickle Tutorship in Mathematics."

In 1892, Hugh Waddell, Esq., South Monaghan, gave the sum of \$2,500 to found, in memory of his father, "The Robert Waddell Tutorship" in Physics or Natural Science.

In 1893, John Roberts, Esq., Ottawa, bequeathed the sum of \$40,000 to the University. In recognition of his generosity, the Trustees resolved that the Chair of Animal Biology should bear his name, and that the Chair of Botany should bear the name of John Roberts Allen, his executor.

In 1892, the Hon. Senator Gowan gave a contribution to be the nucleus of an endowment for a Chair of Political and Economic Science to bear the name of the late Right Hon. Sir John A. Macdonald, and added to it from time to time till in 1898 it amounted to upwards of \$5,000.00. The trustees then issued an appeal for the object to the friends of the great statesman, and this resulted in increasing the sum available to nearly \$22,000. It was then decided to found the Chair, and Professor Adam Shortt was made the first occupant and at the same time he was relieved of the charge of the Charles Tupper, Bart., M.P., pronouncing the oration in honour of his old library and Miss Lois Saunders was appointed Librarian at a salary of \$400. On April 30th, 1899, the Sir John Macdonald Chair was formally established, Sir Charles Tupper, Bart., M.P., pronouncing the oration in honour of his old leader, in the City Hall on that day.

The late Dr. Williamson prepared for "Doomsday Book" a history of the first fifty years of the University. He has given an account of the Funds raised at different times for general or special purposes during this period, with the names of subscribers, down to the Jubilee Fund of 1887-90. When the history is completed, an abridgement with a sketch of the different Funds and the principal contributors will be published in the Calendar.

On Thanksgiving Day, 1906, the late John Charlton, Esq., of Lynedoch, Ont., gave \$50,000 to endow the Chair of Moral Philosophy in Queen's University. This Chair will henceforth be known as the John and Ella G. Charlton Chair of Moral Philosophy.

In 1911 Dr. James Douglas, New York, a graduate of the University gave \$50,000. to endow a Chair of Colonial History. This Chair will be known as the "James Douglas Chair of Colonial History" and its first occupant is Mr. W. L. Grant, M A., the son of the late Principal Grant.
